Re: Street Department 800 MHz Radio Purchase – Per State QPA # 9167

The Federal Communications Commission has a narrowbanding mandate that affects the Street Departments current 2-way communications system. The mandate must be met by January 1, 2013 to comply with the FCC's rules and regulations. The Street Department has elected to move off of the non-narrowband compliant radio system and onto the 800 MHz communications system. The Street Department will now be able to interoperate with all of the other city and county departments. The purchase of 800 MHz radios will operate on the current system as well as the new future P25 radio system. In order to comply in a timely manner and take full advantage of significant discounts offered by the supplier at this time, the Street Department requests the purchase of these radios through Motorola per State QPA # 9167.

In completing this purchase prior to the end of the third quarter, Motorola is offering a discount of \$400 per radio purchased which amounts to a total savings of \$44,800. This purchase will effectively replace all of the existing mobile, portable and base radio units and chargers now in use by the Street Department.

The total cost for this mandated purchase is \$273,822.55
