EFFECT OF PASSAGE:

This chemical performs the de-chlorination of wastewater effluent before discharge into the Maumee River. This de-chlorination process of plant effluent is required by IDEM (Indiana Department of Environmental Management) from March 1<sup>st</sup> through October 31 of each year.

EFFECT OF NON-PASSAGE:

Permit violations for chlorine discharge into the Maumee River would occur and we would be in violation of NPDES (Nation Pollutant Discharge Elimination System) permit.

Topic: Increase in Price agreement for Liquid Sodium Bisulfite

This chemical is used to remove the chlorine from the plant effluent prior to discharge into the Maumee River. This process is a requirement of our NPDES (National Pollutant Discharge Elimination System) permit. A reverse bid was completed with 5 bidders resulting in a savings of 15.5% per unit in 2011. This price will be extended through 2012.

Thanks,

Brian Robinson
