Fort Wayne Construction Trades Development
Contractual Agreement
with
The City of Fort Wayne Water Maintenance
2012

Fort Wayne Construction Trades proposes the following items for the repair and restoration work that the City Water Maintenance is requesting. With the partnership of employment of Fort Wayne Community Schools, Fort Wayne Construction Trades students will begin restoration work as soon as the ground thaws, and will continue working until the 1st of December 2012. A crew will begin the work under general instructional supervision of Chris Roberts and site supervision of Chris Rittenhouse and Jordan Owens. There will be a group of five Junior's hired and one senior re-hired from the Anthis Career Center. All students will be subject to the general hiring guidelines and employment regulations of Fort Wayne Community Schools. The restoration staff will be held to all safety guidelines specified by The City Fort Wayne Water Maintenance. The general hourly pay rate of the entire crew of five students, one dirt crew foreman, one concrete foreman, one daily operations supervisor, and one general instructor is \$170.00. At the conclusion of the 2011- 2012 school year the instructor will join the team of construction trades students. This pay scale is subject to change due to weekly crew changes and personnel daily schedules but will not exceed the \$170.00 per hour rate. The amount per hour will only exceed the rate listed above due to overtime pay, at a rate of time and a half.

All materials necessary for job completion will be charged to City Water Maintenance over and beyond the general hourly rate. The items included as part of material fees would include concrete, rebar, expansion, curing, form release, gasoline, light hand tools and forms. All receipts and invoices will be returned to City Water Maintenance for their records.

RE: Concrete, Grass, & Soil Restoration by Anthis Career Center

Michael E. Hunt
11-8-12

Council District – City Wide

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: Concrete, Grass, & Soil Restoration for Water Maintenance Cuts as follows: Fort Wayne Construction Trades (Fort Wayne Community Schools Anthis Career Center) will provide concrete, grass, and soil restoration for cuts made by Water Maintenance and Service when repairing main, services, and other water distribution system piping. Anthis Career Center will employ Junior and Senior students enrolled in their Construction Trades program. A five-man crew, one dirt crew foreman, one concrete crew foreman, one daily operations supervisor, and one general instructor will be compensated a not to exceed amount of \$170.00 per hour. All required materials shall be paid for by Water Maintenance. The not-to-exceed amount for this contract was originally \$95,000.00, but shall be increased to \$120,000.00 for the 2012 calendar year as the result of an increased amount of watermain breaks necessitating restoration.

Implications of not being approved: Anthis Career Center provides a cost effective solution for repairing Water Maintenance cuts. This opportunity provides vital training for the students participating in the program providing them with the skills required to enter the workforce after graduation. If this contract is not approved, this training opportunity will be lost and the work will be either brought in house and completed by WMS staff as time permits or bid out to an outside contractor, likely at an increased cost.

If Prior Approval is being Requested, Justify: Prior approval not requested

The cost of said project funded by Water Utility.
