A DECLARATORY RESOLUTION designating an "Economic Revitalization Area" under I.C. 6-1.1-12.1 for property commonly known as 3706 Transportation Drive, Fort Wayne, Indiana 46818 (Advanced Machine & Tool Corp)

WHEREAS, Petitioner has duly filed its petition dated May 17, 2013 to have the following described property designated and declared an "Economic Revitalization Area" under Sections 153.13-153.24 of the Municipal Code of the City of Fort Wayne, Indiana, and I.C. 6-1.1-12.1, to wit:

Attached hereto as "Exhibit A" as if a part herein;

and

WHEREAS, said project will create four full-time, permanent jobs for a total new, annual payroll of \$214,000, with the average new annual job salary being \$53,500 and retain sixty-eight full-time, permanent jobs for a total current annual payroll of \$5,216,862, with the average current, annual job salary being \$76,719; and

WHEREAS, the total estimated project cost is \$228,760; and

WHEREAS, it appears the said petition should be processed to final determination in accordance with the provisions of said Division 6.

NOW, THEREFORE, BE IT RESOLVED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA:

SECTION 1. That, subject to the requirements of Section 6, below, the property hereinabove described is hereby designated and declared an "Economic Revitalization Area" under I.C. 6-1.1-12.1. Said designation shall begin upon the effective date of the Confirming Resolution referred to in Section 6 of this Resolution and shall terminate on December 31, 2016, unless otherwise automatically extended in five year increments per I.C. 6-1.1-12.1-9.

SECTION 2. That, upon adoption of the Resolution:

- (a) Said Resolution shall be filed with the Allen County Assessor;
- (b) Said Resolution shall be referred to the Committee on Finance requesting a recommendation from said committee concerning the advisability of designating the above area an "Economic Revitalization Area";
- (c) Common Council shall publish notice in accordance with I.C. 6-1.1-12.1-2.5 and I.C. 5-3-1 of the adoption and substance of this resolution and setting this designation as an "Economic Revitalization Area" for public hearing;

SECTION 3. That, said designation of the hereinabove described property as an "Economic Revitalization Area" shall apply to a deduction of the assessed value of personal property for new manufacturing equipment.

SECTION 4. That, the estimate of the number of individuals that will be employed or whose employment will be retained and the estimate of the annual salaries of those individuals and the estimate of the value of new manufacturing equipment, all contained in Petitioner's Statement of Benefits, are reasonable and are benefits that can be reasonably expected to result from the proposed described installation of new manufacturing equipment.

SECTION 5. That, the current year approximate tax rates for taxing units within the City would be:

- (a) If the proposed new manufacturing equipment is not installed, the approximate current year tax rates for this site would be \$3.1821/\$100.
- (b) If the proposed new manufacturing equipment is installed and no deduction is granted, the approximate current year tax rate for the site would be \$3.1821/\$100 (the change would be negligible).
- (c) If the proposed new manufacturing equipment is installed and a deduction percentage of eighty percent (80%) is assumed, the approximate current year tax rate for the site would be \$3.1821/\$100 (the change would be negligible).

SECTION 6. That, this Resolution shall be subject to being confirmed, modified and confirmed, or rescinded after public hearing and receipt by Common Council of the above described recommendations and resolution, if applicable.

SECTION 7. That, pursuant to I.C. 6-1.1-12.1, it is hereby determined that the deduction from the assessed value of the new manufacturing equipment shall be for a period of ten years.

SECTION 8. That, the benefits described in the Petitioner's Statement of Benefits can be reasonably expected to result from the project and are sufficient to justify the applicable deductions.

SECTION 9. That, the taxpayer is non-delinquent on any and all property tax due to jurisdictions within Allen County, Indiana.

SECTION 10. That, pursuant to I.C. 6-1.1-12.1-12 et al, any property owner that has received a deduction under section 3 or 4.5 of said chapter may be required to repay the deduction amount as determined by the county auditor in accordance with section 12 of said chapter if the property owner ceases operations at the facility for which the deduction was granted and if the Common Council finds that the property owner obtained the deduction by intentionally providing false information concerning the property owner's plans to continue operation at the facility.

| 1 | SECTION 11. That, this Resolution shall be in full force and effect from and after |

| | | | |

In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA? REFER TO EXHIBIT "C"

AMT WOULD LIKE TO REPLACE & UPDATE ONE OF OUR PRODUCTION

MACHINES, REFERRED TO AG A "WIRE EOM." THE ORIGINAL

GF AgieCharmilles - Wire EDM

GF AgieCharmilles CUT 300

AgieCharmilles is pleased to propose the CUT300 machining center with a Micro-processor numerical control, for the automatic machining of workpleces from roughing to finishing, automatic execution of elementary machining operations, machining cycles, part programs and any other operation necessary between programs.

- · Space saving compact design
- 56Rc Chrome hardened table
- Heavy workpiece design without the loss of accuracy
- · Low consumable cost filtration system
- 30° taper capability at max Z height
- 0.00002" resolution glass scales on all axes
- Industrial speed of 28sq. inches/hour
- · Collision protection on all axes
- Rhenocast base for thermal stability and vibration dampening
- 3m/min XY travel speeds with ICP (Integrated Collision Protection)
- Under 20 Seconds Spark to Spark time (Turn off Generator, Cut wire, Thread wire, Turn on Generator)
- Thread and rethread 0.003" diameter. (With small wire kit option)

Features

AUTO RESTART

During machining, if a power failure occurs, this feature will automatically restart machining operations if power is restored within 3 minutes.

AUTO-DIAGNOSTICS

Software allowing checking and troubleshooting of the electronic boards and electric connections of the equipment.

BASIC WEDM

Basic Wire EDM training is provided during the warrantee period for 2 people at a GF AgieCharmilles US facility provided the same or equivalent machine is installed. Basic Wire EDM consists of 4.5 days which cover:

- Control overview
- Preparation of a job
- · Manual and automatic setting of machine parameters
- Basic operator maintenance of the machine

Hotel and transportation is not included but information can be provided by an AgieCharmilles Training coordinator as well as a more detailed training agenda.

BRIDGE-STYLE CONSTRUCTION

Provides a fixed workpiece table for heavy workpieces without, sacrificing accuracy or collision protection from all axes. Included in this construction is a base made of Rhenocast a mineral cast material which is non-conductive, cannot rust, reduces vibration by up to 10x than cast iron, and thermal stability 4x better than cast iron.

CT EXPERT

This Expert system will suggest the best strategies to cut a profile by asking the operator simple questions, freeing up the operator of the need to automatically calculate offsets and select the proper power settings.

CT-3D SETUP

This function simplifies the alignment of the wire to 90° of the top of the workpiece, when either the workpiece is too big and heavy to adjust flat or clamping to the table makes it difficult to adjust flatness.

DIELETRIC UNIT - CUT300

Independent from the machine, filtration of 317 gallons is managed by a 2 paper 5 micron filters and deionization is regulated, and the conductivity values is displayed on the machine screen. If water levels are low the machine water compensation system will add tap water from external connection. A heat exchanger is used to connect a chiller in order to cool the dielectric water.

DIRECT CUT 15

With 0.006 dia. brass wire, allows a high speed one cut to a fine finish with the same accuracy as 1 rough and 2 skims with 0.010" dia. brass wire. This feature reduces consumable cost in wire, contact, and filter life.

GRAPHIC PAGE - MONITORING

Display a monitoring page, which includes of all information the most commonly used by operator while the machine is cutting.

HIGH ACCURACY MEASURING SYSTEM

The 0.1 micron (0.0000039") encoders resolution and 0.5 micron (0.000019") glass scales on all axes accompanied with high performance AC motors guarantees the highest degree of accuracy on opposing preloaded "V" slides, with a positional deviation (Pa) of 0.00059" and a reversal error U of 0.00007" according to VDI 3441 inspection.

LOCKOUT SOFTWARE

The control will issue a notice reminding you of the remaining days before payment is due on the machine invoice. When your payment is received, AgieCharmilles will issue a password. This password must be entered into the control in a timely manner or the machine will lock out all operations.

NON CONTACT HOLE SEARCH

This feature allows the wire to find a location in a wire start hole where the wire is not in contact with the part. After it finds this location, the machine will start the generator and cut back to the start location of the program.

NUMERICAL CONTROL

This numerical control has a high performance multi-processor PENTIUM ® with 512Mb of RAM which provides fast processing with a high level of reliability. The HMI (Human Machine Interface) operating system is WINDOWS XP ® and allows for several tasks to be processed simultaneously. With a USB port, and an Ethernet RJ45 connection standard, it gives flexibility in communication from the operator. A 101 alphanumeric standard PC keyboard allows input for the operator as easy as using a standard PC and the 12.1 TFT touch screen doubles as a mouse input from operator touch and visual output monitor. Also a 40 Gb hard drive min. allows enough storage capacity to store vast amounts of files in an easy Windows Explorer style format. Note: Ethernet connection to network is the responsibility of the customer

ON BOARD DOCUMENTATION

This easy to use HTML document helps operators in maintenance, ISO code definitions, and part item lookup.

PILOT EXPERT

Variable height, entry and exit from the workpiece, as well as machining near the edges, are critical operations. An unsuitable spark intensity, too high speed or insufficient flushing may cause wire breakage. Built into the control, a powerful protection strategy will automatically optimize speed, flushing and spark intensity in order to prevent wire breakage.

PROFIL EXPERT

Standard AgieCharmilles wire EDM feature, which automatically adjusts flushing pressure, wire tension, and frequency to eliminate wire drag in sharp corners or small details.

Smart Theader - FST

Fast submerged threading provides reliable auto-threading in non-submerged and submerged conditions. This system has 99+% reliability in sealed 6" deep holes as small as 0.023" dia. with 0.010" dia. wire either in a submerged condition or not. Also possible is threading a hole 0.080" dia. fully submerged at max. height of the Z travel.

SURFACE EXPERT

Mastery of complex shape accuracy and surface finish. The smart function enables accuracy and homogeneous surface finish on parts with variable heights. The intelligent module automatically adjusts the sparking parameters used during skim cuts to ensure excellent surface quality on the most varied parts.

UPTIME+ FOR WEDM

With today's truly global market, manufacturers must maximize productivity to maintain a competitive edge. Success depends heavily on achieving consistent and reliable operation from every piece of equipment in your production system, enabling the flexibility, throughput time and cost minimization that your company needs to thrive. GF AgieCharmilles Uptime+ empowers you to meet this challenge head on.

All Uptime+ programs include access to GF AgieCharmilles' operator training, technical support, product/process assessment and Privilege Club, a consumables rewards program.

Each new machine purchase automatically includes Uptime+ Level 1, with the option to select a higher level for more comprehensive benefits.

Uptime+ Level 1 Includes:

- · Two year parts
- One year Labor
- · Parts price matching non-proprietary parts, if criteria is meet
 - · Price is of one item
 - · Delivery is the same
- PPA (Product/Process Assessment) visit 10 to 12 months after installation of machine
- · Privilege Club
 - Each dollar spent on consumables = 1 Privilege Point
 - · Use points for
 - · Options, accessories and upgrades
 - Operator training
 - Preventative Maintenance Contracts

WIRE THREAD HOLE SEARCH

When executing a program where the machine threads the wire at a certain location and the wire start hole is slightly out of location. This feature will search for the hole in a circular pattern. Once found, the wire will then thread at this new location, start up the generator and cut back to the wire thread location in the program in order to start the job.

WORK TABLE - CUTx00

The working table consists of a closed frame in chromed hardened stainless steel to assure perfect machine accuracy over time and uniform electrical conductibility. The thickness is designed for a high level of rigidity. It is equipped with M8 holes distributed in rows all around the frame with a pitch of 50 mm (1.96").

Options

135.018.720

Provides the generator with the power needed to uses 0.012" (0.30mm) to 0.013" (0.33mm) coated wire when speed is number one priority.

NOTE: Factory installed only variant

135.018.750

Additional Filtration

202.895.041

Allows for larger spools to be added to the machine. Maximum spool weight 55lbs.

500,109,424

Wire is chopped in the lower head into .200" lengths reducing the amount of room needed in the back of the machine for used wire

Wire diameters 0,006" to 0.013" coated or brass

· Wire bin can hold up to 55 lbs

DX2-2400GP-C

Digital readout meter used for checking the tension the wire is using during a certain power setting. Used during maintenance for check and adjusting the wire to the proper tension.

M1-2A-CH-460

A chiller is required for operation of the machine. (The chiller used should meet the following specifications.)

| Cooling capacity | 22,000 BTU/hr. |
|-------------------------|------------------|
| Input voltage (3 phase) | 460 VAC . |
| Dimensions (LxWxH) | 37" x 24" x 30" |
| Weight | Approx. 290 lbs. |

Note: Electrical supply separate from machine.

Specifications

| Machine Dimensions: | 102.4" x 110.6" x 88.2" |
|--|--|
| Net Weight: | 7275 lbs without dielectric |
| Max. workpiece dimensions (L x W x H): | 47.2" x 27.6" x 15.75" |
| Axis travel (X, Y, Z): | 21.7" x 13.8" x 15.75" |
| Axis travel (U,V): | 21.7" x 13.8" |
| Permissible workpiece weight: | 3307 lbs |
| Work Area Door | Swing out hinged door |
| Generator: | AC Clean Cut |
| Max. cutting rate: | 28 in²/hr industrial |
| Rapid Traverse: | 9.8425 ft.p.m |
| Wire sizes (standard): | 0.010" |
| Wire sizes (optional): | 0.003", 0.004", 0.006", 0.008", 0.012", 0.013" |
| Wire Guides Types: | 0,00008 clearance round guides |
| Wire spool: | Up to 55 lbs with big spool option – 17.6 lbs standard |
| Taper angle (standard): | 30 degrees at max height |
| Taper angle (optional): | 48 degrees at max height |
| Surface Integrity: | 0.0001 recast after 4 passes |
| Surface finish (standard): | CH0 or 4.0 micro inch |
| Contacts: | Index able Carbide |
| Control/Servo Resolution: | 0.0000039" Encoders and 0.000019" Glass scales |
| Repeatability, Pa: | 0.00007" |
| Max. noise level: | 78 db |
| Control: | Millennium Control |
| CNC Control Processors: | PENTIUM |
| Display; | 12.1 TFT Color (Touch screen) |
| Hard Disk Drive Capacity: | 40 Gb min |
| RAM: | 512 Mb |

Enviromental Requirements

Quote ID: AQ201316880-2

Electrical

Voltage required is 3 phased 208/220/240/380/440/480 [VAC]

Permissible fluctuation +/- 10%

Permissible Micro Break 5 ms

Total installed power is 12 KVA

Note: 3 phased (close delta) power configuration is need for proper operation of the machine.

Quote ID: AQ201316880-2

Compressed Air

Min 90psi of steady and uninterrupted supply, filtered and dry air

Relative Humidity

Between 40% and 80% is permissible

Temperature

68°F +/- 7°F is permissible range of ambient temperature. However, to maximize accuracy 68°F +/- 2°F is required.

Vibration

Max. 0.1g of sporadic vibration

Max. 3 microns for continuous vibration

<u>Water</u>

460 gallons of deionized water with a conductivity of 15 micro siemens / cm

Quote ID: AQ201316880-2

This machine is manufactured in Switzerland to the very strict IEC-204 and VDI standards. Any modifications to the equipment to meet state, local or provincial ordinances will be solely the responsibility of the customer.*

Options

Option prices apply only if specified at the time of system order. If ordered later, field installation prices may apply. Consult your AgieCharmilles representative for field installed option pricing, delivery and applicability.

Warranty

Warranty period is twelve (12) months from the date of installation with no hourly limit. Warranty period for items purchased from third parties may be different. See the attached TERM AND CONDITIONS for further details

Installation

Upon delivery of the machine and notification to the service department that all utility and installation requirements are completed per the Pre-installation manual, our factory trained technician will install and commission the system

GF AgieCharmilles training

Training is provided for two (2) participants through regularly scheduled classes conducted at a GF AgieCharmilles training facility. The course duration is one week, with time for open discussion on individual requirements and applications. An advanced operator training course is also available and is recommended for all operators. It is suggested that operators attend this advanced course approximately six (6) months or more after the machine has been placed into operation.

Note: Optional onsite training is available, see option section for details.

REAL PROPERTY INFORMATION

| Complete this section of the application if you are requesting a deduction from assessed value for real property improvements. |
|---|
| Describe any structure(s) that is/are currently on the property: |
| Describe the condition of the structure(s) listed above: |
| Describe the improvements to be made to the property to be designated for tax phase-in purposes: |
| Projected construction start (month/year): |
| Projected construction completion (month/year): |
| Yes No Will construction result in Leadership in Energy and Environmental Design (LEED) certification by the U.S. Green Building Council? |
| Yes No Will construction use techniques to minimize impact on combined sewer overflows? (i.e. rain gardens, bio swales, etc.) |

PERSONAL PROPERTY INFORMATION

Complete this section of the application if you are requesting a deduction from assessed value of new manufacturing, research and development, logistical distribution or information technology equipment.

List below the equipment for which you are seeking an economic revitalization area designation.

Manufacturing equipment must be used in the direct production, manufacture, fabrication, assembly, extraction, mining, processing, refining, or finishing of other tangible personal property at the site to be designated. Research and development equipment consists of laboratory equipment, research and development equipment, computers and computer software, telecommunications equipment or testing equipment used in research and development activities devoted directly and exclusively to experimental or laboratory research and development for new products, new uses of existing products, or improving or testing existing products at the site to be designated. Logistical distribution equipment consists of racking equipment, scanning or coding equipment, separators, conveyors, fork lifts or lifting equipment, transitional moving equipment, packaging equipment, sorting and picking equipment, software for technology used in logistical distribution, is used for the storage or distribution of goods, services, or information. Information technology equipment consists of equipment, including software used in the fields of information processing, office automation, telecommunication facilities and networks, informatics, network administration, software development and fiber optics: (use additional sheets, if necessary)

EMPLOYMENT INFORMATION FOR FACILITY TO BE DESIGNATED

ESTIMATE OF EMPLOYEES AND PAYROLL FOR FORT WAYNE FACILITY REQUESTING ECONOMIC REVITALIZATION AREA DESIGNATION

Please be specific on job descriptions. When listing the occupation codes, please avoid using the "Major Occupational Groupings" (i.e. 11-000, 13-000, 15-000, etc.) which are more general in nature. Instead, use specific occupation codes (i.e. 11-1021, 13-1081, 15-2041 etc) for each created and retained job. To fill out information on occupation and occupation code, use data available through Occupation Employment Statistics for Fort Wayne http://www.bls.gov/oes/current/oes-23060.htm

REQUIRED ATTACHMENTS

The following must be attached to the application.

- Statement of Benefits Form(s) (first page/front side completed)
 - 2. Full legal description of property and a plat map identifying the property boundaries. (Property tax bill legal descriptions are not sufficient.) Should be marked as Exhibit A.
 - 3. Check for non-refundable application fee made payable to the City of Fort Wayne.

| ERA filing fee (either real or personal property improvements) | .1% of total project cost not to exceed \$500 |
|--|---|
| ERA filing fee (both real and personal property improvements) | .1% of total project cost not to exceed \$750 |
| ERA filing fee (vacant commercial or industrial building) | \$500 |
| ERA filing fee in an EDTA | \$100 |
| Amendment to extend designation period | \$300 |
| Waiver of non compliance with ERA filing | \$500 + ERA filing fee |

NIA Owner's Certificate (if applicant is not the owner of property to be designated) Should be marked as Exhibit B if applicable.

CERTIFICATION

I, as the legal taxpayer and/or owner, hereby certify that all information and representations made on this application and its attached exhibits are true and complete and that neither an Improvement Location Permit nor a Structural Permit has been filed for construction of improvements, nor has any manufacturing, research and development, logistical distribution or information technology equipment which is a part of this application been purchased and installed as of the date of filing of this application. I also certify that the taxpayer is not delinquent on any and all property tax due to taxing jurisdictions within Allen County, Indiana. I understand that any incorrect information on this application may result in a rescission of any tax phase-ins which I may receive.

I understand that I must file a correctly completed Compliance with Statement of Benefits Form (CF-1/Real Property for real property improvements and CF-1/PP for personal property improvements) and the Public Benefit Annual Update with the City of Fort Wayne Community Development Division in each year in which I receive a deduction. Further the CF-1/PP form must be filed with the county assessor and the CF-1/Real Property must be filed with the county auditor. Failure to file the CF-1 form with these agencies may result in a rescission of any tax phase-in occurring as a result of this application.

INSTRUCTIONS:

- 1. This statement must be submitted to the body designating the Economic Revitalization Area prior to the public hearing if the designating body requires information from the applicant in making its decision about whether to designate an Economic Revitalization Area. Of therwise this statement must be submitted to the designating body BEFORE a person installs the new manufacturing equipment and/or research and development equipment, and/or logistical distribution equipment and/or information technology equipment for which the person wishes to claim a deduction. "Projects" planned or committed to after July 1, 1987, and areas designated after July 1, 1987, require a STATEMENT OF BENEFITS. (IC 6-1.1-12.1)
- Approval of the designating body (City Council, Town Board, County Council, etc.) must be obtained prior to installation of the new manufacturing equipment and/or research and development equipment and/or logistical distribution equipment and/or information technology equipment, BEFORE a deduction may be approved
- 3. To obtain a deduction, a person must file a certified deduction schedule with the person's personal property return on a certified deduction schedule (Form 103-ERA) with the township assessor of the township where the property is situated or with the county assessor if there is no township assessor for the township. The 103-ERA must be filed between March 1 and May 15 of the assessment year in which new manufacturing equipment and/or research and development equipment and/or logistical distribution equipment and/or information technology equipment is installed and fully functional, unless a filing extension has been obtained. A person who obtains a filing extension must file the form between March 1 and the extended due date of that year.
- 4. Property owners whose Statement of Benefits was approved after June 30, 1991, must submit Form CF-1 / PP annually to show compliance with the Statement of Benefits. (IC 6-1.1-12.1-5.6)
- The schedules established under IC 6-1.1-12.1-4.5(d) and (e) apply to equipment installed after March 1, 2001, unless an alternative deduction schedule is adopted by the designating body (IC 6-1.1-12.1-17).

IDENTIFICATION OF PROPERTY, 3706 TRANSPORTATION DE, FT WAYNE IN 46818

The subject of this appraisal valuation is comprised of a land tract containing a net land area of 3.68 acres, which is rectangular in shape and situated at the northeast corner of Huguenard Road and Transportation Drive on Fort Wayne's northwest side within Edgewood Industrial Park. The tract has been improved with a one-story, preengineered, light manufacturing facility containing 60,000 square feet, of which 7,805 square feet are office area. There is additional mezzanine area of 14,135 square feet, of which 5,355 square feet are office mezzanine and 8,780 square feet are storage mezzanine. In addition to the building improvement, there are complementary site improvements including 65,869 square feet of asphalt-paved parking; 6,377 square feet of concrete walks, pads, and truck wells; and typical lawn and landscaping.

The subject property was built in two phases, with the north portion, which contains 19,958 square feet, being constructed in 1990 and the south portion, which contains 40,042 square feet, built in 2001. The appraisal assignment is to provide a value indication for a 43.3 percent interest in the southern portion. This will be discussed more fully in the "Scope of Work" section of this report.

DIGEST SHEET

TITLE OF ORDINANCE:

Declaratory Resolution

DEPARTMENT REQUESTING ORDINANCE:

Community Development Division

SYNOPSIS OF ORDINANCE: Advanced Machine & Tool Corp is requesting the designation of an Economic Revitalization Area for personal property improvements in the amount of \$228,760. In order to expand, Advanced Machine & Tool Corp will install new manufacturing equipment to replace the current equipment which is obsolete and requires costly repairs and maintenance.

EFFECT OF PASSAGE: Installing the new equipment will allow Advanced Machine & Tool Corp to reduce maintenance costs while also installing the new machine which is a newer technology and a better grade. Four full-time jobs will be created.

EFFECT OF NON-PASSAGE: Potential loss of development and four full-time jobs

MONEY INVOLVED (DIRECT COSTS, EXPENDITURES, SAVINGS): No expenditures of public funds required.

ASSIGNED TO COMMITTEE (PRESIDENT): John Crawford and Tom Smith

MEMORANDUM

To:

City Council

FROM:

Adam Welch, Economic Development Specialist

DATE:

May 17, 2013

RE:

Request for designation by Advanced Machine & Tool Corp as an ERA for

personal property improvements
