In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA?

A majority of the investment will be spent on tooling to upgrade of our griddle product. Our griddle product currently has welded corners and with this new innovative process and tooling, the griddle will have rounded corners which will increase the reliability of our product. Also, these upgrades need to be done to continue to make our company efficient and profitable.
