What Are The Implications If Not Approved:

The project improvements will not occur and the city will lose and 80% match of federal funds. This would also stop a front door project from enhancing the entrance into the City from the east side. This section is congested at times and is in needed of the added capacity. Also there is currently no pedestrian infrastructure along this section of roadway. Drainage is also a concern and is currently accommodated with some storm sewers but primarily side ditches. This project has been in the long range transportation plan for many years and we have received requests for this widening from area residents and businesses. If this contract is not approved, existing and future traffic conditions will continue to deteriorate.

If Prior Approval Is Being Requested, Justify: N/A

Additional Comments: DLZ Engineering was selected to perform the preliminary engineering services on this project through INDOT's RFP process. The request for proposals was posted on INDOT's website and we received four proposals. These proposals were scored per INDOT's guidelines and DLZ Engineering was selected as the most responsive firm. They were responsible for the design of the Auburn Road widening , where they did a great job of layout of several project items in a tight area. They have been involved with designing many projects for the City of Fort Wayne and we have been very pleased with their services. The contract, including the overhead rates and man hour justifications have been reviewed and approved by INDOT.

- D. *Disputes.* If a dispute exists as to the CONSULTANT's liability or guilt in any action initiated by the LPA, and the LPA decides to delay, withhold, or deny work to the CONSULTANT, the CONSULTANT may request that it be allowed to continue, or receive work, without delay. The CONSULTANT must submit, in writing, a request for review to the LPA. A determination by the LPA under this Section 7.D shall be final and binding on the parties and not subject to administrative review. Any payments the LPA may delay, withhold, deny, or apply under this section shall not be subject to penalty or interest under IC 5-17-5.
8. **Condition of Payment.** The CONSULTANT must perform all Services under this Contract to the LPA's reasonable satisfaction, as determined at the discretion of the LPA and in accordance with all applicable federal, state, local laws, ordinances, rules, and regulations. The LPA will not pay for work not performed to the LPA's reasonable satisfaction, inconsistent with this Contract or performed in violation of federal, state, or local law (collectively, "deficiencies") until all deficiencies are remedied in a timely manner.

9. **Confidentiality of LPA Information.**

- A. The CONSULTANT understands and agrees that data, materials, and information disclosed to the CONSULTANT may contain confidential and protected information. Therefore, the CONSULTANT covenants that data, material, and information gathered, based upon or disclosed to the CONSULTANT for the purpose of this Contract, will not be disclosed to others or discussed with third parties without the LPA's prior written consent.
- B. The parties acknowledge that the Services to be performed by the CONSULTANT for the LPA under this Contract may require or allow access to data, materials, and information containing Social Security numbers and maintained by the LPA in its computer system or other records. In addition to the covenant made above in this section and pursuant to 10 IAC 5-3-1(4), the CONSULTANT and the LPA agree to comply with the provisions of IC 4-1-10 and IC 4-1-11. If any Social Security number(s) is/are disclosed by the CONSULTANT, the CONSULTANT agrees to pay the cost of the notice of disclosure of a breach of the security of the system in addition to any other claims and expenses for which it is liable under the terms of this Contract.

10. **Delays and Extensions.** The CONSULTANT agrees that no charges or claim for damages shall be made by it for any minor delays from any cause whatsoever during the progress of any portion of the Services specified in this Contract. Such delays, if any, shall be compensated for by an extension of time for such period as may be determined by the LPA subject to the CONSULTANT's approval, it being understood, however, that permitting the CONSULTANT to proceed to complete any services, or any part of them after the date to which the time of completion may have been extended, shall in no way operate as a waiver on the part of the LPA of any of its rights herein. In the event of substantial delays or extensions, or change of any kind, not caused by the CONSULTANT, which causes a material change in scope, character or complexity of work the CONSULTANT is to perform under this Contract, the LPA at its sole discretion shall determine any adjustments in compensation and in the schedule for completion of the Services. CONSULTANT must notify the LPA in writing of a material change in the work immediately after the CONSULTANT first recognizes the material change.

11. **DBE Requirements.**

- A. Notice is hereby given to the CONSULTANT and any SUB-CONSULTANT, and both agree, that failure to carry out the requirements set forth in 49 CFR Sec. 26.13(b) shall constitute a breach of this Contract and, after notification and failure to promptly cure such breach, may result in termination of this Contract or such remedy as INDOT deems appropriate. The referenced section requires the following assurance to be included in all subsequent contracts between the CONSULTANT and any SUB-CONSULTANT:

The CONSULTANT, sub recipient or SUB-CONSULTANT shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Contract. The CONSULTANT shall carry out applicable requirements of 49 CFR Part 26 in the award and administration of DOT-assisted contracts. - B. The CONSULTANT shall make good faith efforts to achieve the DBE percentage goal that may be included as part of this Contract with the approved DBE SUB-CONSULTANTS identified on its Affirmative Action Certification submitted with its Letter of Interest, or with approved amendments. Any changes to a DBE firm listed in the Affirmative Action Certification must be requested in writing and receive prior approval by the LPA and INDOT's Economic Opportunity Division Director. After this Contract is completed and if a DBE SUB-CONSULTANT has performed services thereon, the CONSULTANT must complete, and return, a Disadvantaged Business Enterprise Utilization Affidavit ("DBE-3 Form") to INDOT's

Economic Opportunity Division Director. The DBE-3 Form requires certification by the CONSULTANT AND DBE SUB-CONSULTANT that the committed contract amounts have been paid and received.

12. Non-Discrimination.

- A. Pursuant to I.C. 22-9-1-10, the Civil Rights Act of 1964, and the Americans with Disabilities Act, the CONSULTANT shall not discriminate against any employee or applicant for employment, to be employed in the performance of work under this Contract, with respect to hire, tenure, terms, conditions or privileges of employment or any matter directly or indirectly related to employment, because of race, color, religion, sex, disability, national origin, ancestry or status as a veteran. Breach of this covenant may be regarded as a material breach of this Contract. Acceptance of this Contract also signifies compliance with applicable federal laws, regulations, and executive orders prohibiting discrimination in the provision of services based on race, color, national origin, age, sex, disability or status as a veteran.
- B. The CONSULTANT understands that the LPA is a recipient of federal funds. Pursuant to that understanding, the CONSULTANT agrees that if the CONSULTANT employs fifty (50) or more employees and does at least \$50,000.00 worth of business with the State and is not exempt, the CONSULTANT will comply with the affirmative action reporting requirements of 41 CFR 60-1.7. The CONSULTANT shall comply with Section 202 of executive order 11246, as amended, 41 CFR 60-250, and 41 CFR 60-741, as amended, which are incorporated herein by specific reference. Breach of this covenant may be regarded as a material breach of Contract.

It is the policy of INDOT to assure full compliance with Title VI of the Civil Rights Act of 1964, the Americans with Disabilities Act and Section 504 of the Vocational Rehabilitation Act and related statutes and regulations in all programs and activities. Title VI and related statutes require that no person in the United States shall on the grounds of race, color or national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. (INDOT's Title VI enforcement shall include the following additional grounds: sex, ancestry, age, income status, religion and disability.)

- C. - E. The CONSULTANT shall not modify the Project in such a manner as to deny reasonable access to and use thereof to any persons on the basis of race, color or national origin. - F. The CONSULTANT shall neither allow discrimination by contractors in their selection and retention of subcontractors, lessors and/or material suppliers, nor allow discrimination by their subcontractors in their selection of subcontractors, lessors or material suppliers, who participate in construction, right-of-way clearance and related projects.

- G. The CONSULTANT shall take appropriate actions to correct any deficiency determined by itself and/or the Federal Highway Administration ("FHWA") within a reasonable time period, not to exceed ninety (90) days, in order to implement Title VI compliance in accordance with INDOT's assurances and guidelines.
- H. During the performance of this Contract, the CONSULTANT, for itself, its assignees and successors in interest (hereinafter referred to as the "CONSULTANT") agrees as follows:
- (1) Compliance with Regulations: The CONSULTANT shall comply with the Regulation relative to nondiscrimination in Federally-assisted programs of the Department of Transportation (hereinafter, "DOT") Title 49, Code of Federal Regulations, Part 21, as they may be amended from time to time, (hereinafter referred to as the Regulations), which are herein incorporated by reference and made a part of this Contract.
 - (2) Nondiscrimination: The CONSULTANT, with regard to the work performed by it during the Contract, shall not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurements of materials and leases of equipment.  - (3) Solicitations for SUBCONSULTANTS, Including Procurements of Materials and Equipment: In all solicitations either by competitive bidding or negotiation made by the CONSULTANT for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential SUBCONSULTANT or supplier shall be notified by the CONSULTANT of the CONSULTANT'S obligations under this Contract and the Regulations relative to nondiscrimination on the grounds of race, color, or national origin.
 - (4) Information and Reports: The CONSULTANT shall provide all information and reports required by the Regulations or directives issued pursuant thereto, and shall permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the LPA or INDOT to be pertinent to ascertain compliance with such Regulations, orders and instructions. Where any information required of a CONSULTANT is in the exclusive possession of another who fails or refuses to furnish this information the CONSULTANT shall so certify to the LPA, or INDOT as appropriate, and shall set forth what efforts it has made to obtain the information.
 - (5) Sanctions for Noncompliance: In the event of the CONSULTANT'S noncompliance with the nondiscrimination provisions of this contract, the LPA shall impose such contract sanctions as it or INDOT may determine to be appropriate, including, but not limited to:
 - (a) withholding of payments to the CONSULTANT under the Contract until the CONSULTANT complies, and/or
 - (b) cancellation, termination or suspension of the Contract, in whole or in part.
 - (6) Incorporation of Provisions: The CONSULTANT shall include the provisions of paragraphs (1) through (6) in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Regulations, or directives issued pursuant thereto.

The CONSULTANT shall take such action with respect to any SUBCONSULTANT procurement as the LPA or INDOT may direct as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that, in the event a CONSULTANT becomes involved in, or is threatened with, litigation with a SUBCONSULTANT or supplier as a result of such direction, the CONSULTANT may request the LPA to enter into such litigation to protect the interests of the LPA, and, in addition, the CONSULTANT may request the United States to enter into such litigation to protect the interests of the United States.

13. Disputes.

- A. Should any disputes arise with respect to this Contract, the CONSULTANT and the LPA agree to act promptly and in good faith to resolve such disputes in accordance with this Section 13. Time is of the essence in the resolution of disputes.
- B. The CONSULTANT agrees that the existence of a dispute notwithstanding, it will continue without delay to carry out all of its responsibilities under this Contract that are not affected by the dispute. Should the CONSULTANT fail to continue to perform its responsibilities regarding all non-disputed work, without delay, any additional costs (including reasonable attorneys' fees and expenses) incurred by the LPA or the CONSULTANT as a result of such failure to proceed shall be borne by the CONSULTANT.
- C. If a party to this Contract is not satisfied with the progress toward resolving a dispute, the party must notify the other party of this dissatisfaction in writing. Upon written notice, the parties have ten (10) business days, unless the parties mutually agree in writing to extend this period, following the written notification to resolve the dispute. If the dispute is not resolved within ten (10) business days, a dissatisfied party may submit the dispute in writing to initiate negotiations to resolve the dispute. The LPA may withhold payments on disputed items pending resolution of the dispute.

14. Drug-Free Workplace Certification.

- A. The CONSULTANT hereby covenants and agrees to make a good faith effort to provide and maintain a drug-free workplace, and that it will give written notice to the LPA within ten (10) days after receiving actual notice that an employee of the CONSULTANT in the State of Indiana has been convicted of a criminal drug violation occurring in the CONSULTANT's workplace. APPENDIX "A"

SERVICES TO BE FURNISHED BY CONSULTANT:

In fulfillment of this Contract, the CONSULTANT shall comply with the requirements of the appropriate regulations and requirements of the Indiana Department of Transportation and Federal Highway Administration.

The CONSULTANT shall be responsible for performing the following activities:

I - BASIC SERVICES BY CONSULTANT

- A. The CONSULTANT will provide the field survey required for preparation of design plans in conformance with the requirements of the *Indiana Department of Transportation Design Manual, Part III, Location Surveys*, except that a copy of which is on file with the CONSULTANT and same is incorporated herein by reference and is made a part hereof. Necessary field survey to include:
1. Complete topographic data along St. Joseph Center Road from the intersection with Clinton Street to 500 feet east of the intersection of St. Joseph Center Road and River Run Trail for a distance of approximately 3,150 feet as shown in **Exhibit 1**.
 2. Between the termination point described in item A.1. and the St. Joseph River Bridge, complete topographic data will be needed for the north side of the roadway (from the crown of the road to the north) only for a distance of approximately 1,000 feet as shown in **Exhibit 1**.
 3. The survey width on St. Joseph Center Road will be 30-feet beyond the apparent right-of-way or a minimum of 80 feet on either side of the centerline of St. Joseph Center Road (including the area described in item 2.).
 4. Complete topographic data along Washington Center Road from 1,200 feet west of the intersection of Washington Center Road and Clinton Street to the intersection itself as shown in **Exhibit 1**.
 5. The survey width on Washington Center Road will be 30-feet beyond the apparent right-of-way or a minimum of 80 feet on either side of the centerline of Washington Center Road.
 6. Complete topographic data along Clinton Street from 800 feet north and 1,200 feet south of the intersection of Washington Center Road/St. Joseph Center Road and Clinton Street to the intersection itself as shown in **Exhibit 1**.
 7. The survey width on Clinton Street will be 30-feet beyond the apparent right-of-way or a minimum of 105 feet on either side of the centerline of Clinton Street.

8. Complete topographic data of the intersection of Washington Center Road/St. Joseph Center Road and Clinton Street as shown in **Exhibit 1**.
9. Centerline crown and edge of pavement survey elevations along St. Joseph Center Road, Washington Center Road, and Clinton Street and all side streets (unnamed entrance on north side of Washington Center Road to the Washington Square Mall, Inland Trail, Concordia Drive, Campus Court, River Run Trail, and Colony Drive) for an additional distance of 400 feet on the approach of each roadway beyond the limits defined above.
10. Establish and reference temporary benchmarks at each end of the project and at approximately 1,000-foot intervals along the alignment (maximum of seven).
11. The ENGINEER shall verify the existing R/W for all streets within the proposed improvements. Subdivision plats and recorded documents pertaining to the R/W will be obtained from the Allen County Recorder's Office. Field crews will search for existing right-of-way monuments, property irons and block corners; all monuments will be located. Field evidence and recorded documents will be analyzed to establish the existing R/W lines. Property lines and owners names will be extracted from the City of Fort Wayne GIS. Existing R/W will be field verified and adjusted accordingly by searching for and locating property corners throughout the project limits and making comparisons with recorded documents. Recorded documents will be retrieved from the Allen County Recorder's office and through commissioner's records. Documentation of the validity of existing R/W will be provided to the client, if it can be obtained. The areas where documentation does not exist will be noted. For those individual parcels where existing R/W documents cannot be found, but there is evidence leading to believe existing R/W exists, further attempts at finding research will be made. For those parcels, a title company will be contracted to research the chain of title to determine if there are sell-offs for right-of-way and provide the documents needed.
12. Provide information regarding existing known surface utilities and subsurface utilities marked in the field by each respective utility owner.
13. Provide minimum of seven (7) control points for the contractor to establish the construction centerline.
14. Alignment points will be staked and witnessed at 500-foot intervals.
15. A Location Control Route Survey will be performed for the length of the project in accordance with IAC 865 – Rule 12 “Competent Practice for Land Surveyors”.
 - a. The Location Control Route Survey will be used to provide a basis for the acquisition Right-of-way as necessary for the project.
 - b. The Location Control Route Survey will be recorded in the Office of the Recorder of Allen County, Indiana.

- B. The Project will consist of the following (for clarity, St. Joseph Center Road is located east of Clinton Street; west of Clinton Street, the roadway is called Washington Center Road):
1. The lane reconfiguration and widening of St. Joseph Center Road from Clinton Street to Campus Court.
 2. The pavement on all four legs of the intersection of Clinton Street and St. Joseph Center Road/Washington Center Road will be rehabilitated. Widening of the pavement will be necessary. The limits of the improvements at the intersection consist of:
 - a. Western leg – easternmost Bishop Dwenger entrance (approximately 875 feet west of the intersection)
 - b. Southern leg – southern entrance to Bishop Dwenger (approximately 900 feet south of the intersection)
 - c. Northern leg – Colony Drive approach (approximately 500 feet north of the intersection)
 3. The INDOT pavement design process will be followed for the proposed treatments on St. Joseph Center Road, Clinton Street, and Washington Center Road. The CONSULTANT understands that the CLIENT's preference is for the existing concrete (PCCP) pavement on Washington Center and Clinton Street to be widened using HMA materials and overlaid with HMA materials. The CONSULTANT also understands that the CLIENT's preference is for any widening on St. Joseph Center Road to consist of PCCP pavement. The prescribed pavement treatments will be designed in accordance with INDOT pavement design practices, which will utilize various pieces of information including, but not limited to, geotechnical information and falling weight deflectometer (scheduled and performed by INDOT Testing personnel) results to develop the proposed pavement improvements.
 4. The typical section of St. Joseph Center Road will consist of four (4) 11-foot wide lanes (two lanes in each direction) with dedicated 11-foot wide turn lanes when applicable.
 - a. Curb and gutter will be installed in order to contain storm water.
 - b. A Two Way Center Left Turn Lane (TWCLTL) will be provided the length of the roadway where a mountable median curb is currently located.
 - c. Refuge locations will be incorporated into the median islands at the two signalized intersections (Clinton Street and River Run Trail).
 - d. Landscaping features such as low-mow grasses and flowers will be provided within the median islands.
 - e. Where possible, a six (6)-foot wide tree lawn is preferred by the LPA
 - f. Landscaping will be incorporated into the oversized existing refuge island located in the SW quadrant of the intersection of Clinton Street and St. Joseph Center Road/Washington Center Road.

5. Storm water on St. Joseph Center Road from the pavement will be conveyed to an enclosed storm sewer via curb and gutter. Proposed outfalls for the enclosed storm sewer system consist of the existing enclosed network on the western end of the corridor (which outfalls to the Kramer Ditch on the north side of Washington Center Road west of Clinton Street – see **Exhibit 2**), and the existing drainage swale located approximately 350' west of River Run Trail (near the eastern end of the project limits). The CONSULTANT will coordinate with CLIENT's designated representatives.
6. Storm water on Washington Center Road will be conveyed via the existing enclosed storm sewer (which outfalls to the Kramer Ditch on the north side of Washington Center Road west of Clinton Street – see **Exhibit 2**).
7. Storm water from the roadway/sidewalk on Clinton Street will be conveyed via existing roadside ditches.
8. The pedestrian access routes (PAR) on the north and south sides of St. Joseph Center Road will be improved. The PAR will comply with current accessibility standards. Proposed improvements are as follows:
 - a. The proposed PAR will consist of concrete sidewalks and will be five (5) feet wide in areas with a tree lawn and six (6) feet wide when placed adjacent to the curb.
 - b. On the south side of St. Joseph Center Road, the proposed PAR will connect to the existing sidewalk at River Run Trail at the eastern end of the project limits.
 - c. On the north side of St. Joseph Center Road, the proposed PAR will connect Clinton Street and the new sidewalk at the bridge over the St. Joseph River Bridge.
 - d. At the southern leg of the intersection of Clinton Street with St. Joseph Center Road/Washington Center Road, the proposed PAR will be located on both the west and east sides of Clinton Street. On the east side, the proposed PAR will extend to the Walgreens entrance south of the intersection. On the west side, the PAR will extend from the intersection to the Bishop Dwenger entrance. The LPA desires that the PAR be located between the existing drainage swale and the existing right-of-way line.
 - e. At the northern leg of the intersection of Clinton Street with St. Joseph Center Road/Washington Center Road, the proposed PAR will be located on both the west and east sides of Clinton Street from the intersection to the Colony Drive/Washington Square Mall entrance. The LPA desires that the PAR be located between the existing drainage swale and the existing right-of-way line.
 - f. An existing refuge island located in the SW quadrant of the intersection on Clinton Street and St. Joseph Center Road/Washington Center Road will need to be improved to meet current accessibility standards.
9. Dual left turn lanes will be provided for northbound and southbound traffic on Clinton Street at the intersection with St. Joseph Center

Road/Washington Center Road. The CLIENT prefers the widening to consist of HMA materials.

10. The right turn lane for northbound traffic on Clinton Street at the intersection with St. Joseph Center Road/Washington Center Road may need to be reconfigured due to its excessive width.
11. Anticipated pavement rehabilitation measures on St. Joseph Center Road will consist of joint repair, concrete pavement repair, slab repair/replacement and full depth patching. The CLIENT prefers that the existing concrete pavement not be cracked and sealed and that any new pavement for widening consist of PCCP pavement. As described in B.3., the proposed improvements are subject to INDOT pavement design analysis.
12. Two traffic signals along the project corridor will require modification, St. Joseph Road/Washington Center Road and Clinton Street and St. Joseph Road and River Run Trail. The CONSULTANT shall prepare traffic signal design plans for both intersections which include the following modifications:
 - a. Traffic signals currently consist of strain poles and span wire configuration. It is not anticipated that any of the existing strain poles will need to be relocated.
 - b. Signal heads will be adjusted, or replaced as needed.
 - c. Pedestrian push buttons, audible alarms, and pedestrian indications with countdown timers will be added to accommodate pedestrians.
 - d. The proposed detection system will be comprised of wireless detectors.
 - e. The controllers and cabinets will be updated in order to accommodate the new detection system.
 - f. Additional overhead lane use signs will be specified as needed, due to the proposed widening and lane reconfiguration.
 - g. New wiring and new conduit.
 - h. The LPA will provide existing signal plans. The CONSULTANT shall conduct a field visit to inventory existing signal equipment and controller cabinet components. LPA will provide access to the controller cabinets for this inventory purposes.
13. The CONSULTANT shall prepare street lighting plans and coordinate electrical service connection points with the utility. The LPA will provide detailed specifications of ornamental pole and light fixtures desired for this project (pending INDOT approval). It is assumed that the LPA or the light fixture manufacturer will provide the pole spacing and the CONSULTANT will not be required to perform lighting spread calculations. The CONSULTANT shall perform voltage drop calculations, identify service point locations, and have plans stamped by a Professional Engineer.
14. The existing public road approaches along St. Joseph Center Road/Washington Center Road/Clinton Street (within the project limits)

will be removed and replaced in accordance with the standard INDOT public road approach construction details.

15. In an effort to span the existing drainage swale located on the south side of St. Joseph Center Road approximately 350 feet west of River Run Trail, the CONSULTANT shall provide a brief two-three page study analyzing the alternatives (each of which is approximately 250 feet long). The study shall identify the opinion of probable construction costs, discuss maintenance concerns, and itemize a listing of positive/negative (utility impacts, constructability, permitting, right-of-way) impacts of each option. Alternatives to be investigated are:
 - a. A pedestrian bridge with H-5 load capacity and concrete deck.
 - b. A boardwalk system, to carry pedestrian loading only.
 - c. Sidewalk mounted atop a retaining wall system.

The CONSULTANT shall incorporate plans for the preferred alternative into the roadway plans.

16. The existing bus stop on St. Joseph Center Road immediately east of Clinton Street shall be replaced as part of the improvements with one that meets current accessibility standards.
 17. The CONSULTANT shall analyze whether the existing guardrail on Clinton Street near the intersection with Washington Center Road/St. Joseph Center Road is warranted or not and recommend to the LPA whether it should be replaced or removed altogether.
 18. The design speed of St. Joseph Center Road/Washington Center Road will be 40 mph. The design speed of Clinton Street will be 45 mph. The design of the project improvements (for Clinton Street, Washington Center Road, and St. Joseph Center Road) will be in accordance with INDOT 3R (Non-Freeway) Standards for a Urban Minor Arterial as a high speed urban roadway.
 19. Maintenance of Traffic plans shall be based on the roadway remaining open to traffic (one lane per direction at a minimum).
 20. All drive approaches located within the project limits will be designed in accordance with the INDOT Standard Drawings for Class I and Class III Drives.
 21. If required and as requested by the LPA, the CONSULTANT shall prepare and submit the proprietary material justification for INDOT's consideration. It is understood that there is no guarantee that INDOT will approve the request. It is assumed that two proprietary material justifications will be required for the ornamental street lighting, one each for the pole and light fixture. The LPA will provide the specifications for the ornamental pole and light fixtures to be used for this project.
- C. The CONSULTANT shall prepare an Abbreviated Engineering Assessment. The report shall be developed in accordance with the *Indiana Department of Transportation Design Manual -- Part I Project Development*.

The Abbreviated Engineering Assessment will describe the project, the existing conditions, the planned improvements, an engineer's statement of probable project costs for the planned improvements and the different considerations utilized in developing the design of the project. The statement of probable project costs shall include separate amounts for land acquisition.

- D. The CONSULTANT shall implement the INDOT Utility Coordination Process for this project. This work shall be in accordance with "*Title 105 of the Indiana Administrative Code Article 13*" and will include performing the roles of Designer, Surveyor, Utility Coordinator, and Consultant Project Manager as defined in Chapter 104 "*Utility Coordination*" of the Indiana Department of Transportation Design Manual which includes: notifying all affected utilities in the project corridor, coordination and meetings with affected utilities, reviewing relocation plans, managing the schedule for utility relocation work, attend weekly construction meetings, report the weekly progress of utility relocation work to the INDOT utility oversight agent, construction engineer, and consultant Project manager.

The SUE will be performed as a Quality Level "A" as defined in ASCE Standard 38-02. The existing underground utilities will be designated by utilizing the Indiana 811 notification system which will mark out "toneable" underground utilities. "Toneable" is defined as any utility capable of carrying an electromagnetic signal. CONSULTANT will survey the marked utilities and place the information on the preliminary plans. As part of the utility coordination process, the plans will be reviewed by the owners of the utilities in order to confirm the veracity of the information presented. Any discrepancies will be addressed on the plans.

After the Preliminary Field Check, up to 20 test holes will be created via air/vacuuming methods in order to determine actual depths of buried utilities in key locations along the corridor (where conflicts are anticipated) as identified by the CONSULTANT. Horizontal and vertical datum will be provided at each test hole at the top of each utility that is exposed. The outside diameter, type of utility, and pipe material composition will be identified at each test hole. An above ground marker will be placed above the centerline of the utility to be used for horizontal and vertical reference information.

Maintenance of traffic devices will be the responsibility of the SUE SUBCONSULTANT.
