Interoffice Memo

Date: 2/20/2017

To: Common Council Members

From: Jon Weirick, City Utilities Engineering

RE: Professional Services Agreement - City Utilities Engineering Electrical, Controls, and Instrumentation On-Call Services

Council District # N/A

Engineer shall provide the City technical services in all phases of the Project to which the scope of services applies. These services will include serving as City's representative for the Project, providing technical consultation and advice, and other customary services incidental thereto. This PSA is for Electrical, Controls, & Instrumentation On-Call Services project. Engineer will provide the City with design, programming, and technical services for requested tasks. The included tasks will be used on an as needed basis for Capital Project Review; Industrial Communications Improvements; Programmable Logic Controller Replacements; and Operations Support for Supervisory Control And Data Acquisition (SCADA) related equipment.

Implications of not being approved:

The utility recently completed a Supervisory Control and Data Acquisition (SCADA) Master Plan which highlighted improvements made to the technology at the waste water treatment plant and reviewed the tools, skills, and requirements to maintain those improvements. Technological change drives improvement and has, as a result, changed the required knowledge, skills, and attributes of the individuals maintaining the equipment. The equipment at the plant is being upgraded and modernized; and is therefore monitored and controlled by industrial computers. This PSA will aid the city staff effectively maintaining the investments to the infrastructure within the utility.

If Prior Approval is being Requested, Justify: N/A

Selection and Approval Process:

The consultant was selected through the Competitive Sealed Proposal (CSP) process. The RFQ announcement was sent to over 100 firms and posted on the City website, and 6 firms submitted a statement of qualifications. Utilities Engineering staff reviewed the qualifications of all interested firms, established a short list of consultants and conducted interviews. A request for proposals was then developed and sent to the selected shortlisted firms. Two shortlisted firms submitted Competitive Sealed Proposals. A scoring matrix was used to score all firms based on responses to the RFQ and RFP's. RFP scoring was based on expertise, prior work experiences, qualifications, proposed scope of work and fee. Using this process, Utilities Engineering selected Phoenix Consulting LLC for this project and finds their scope and fee to be the best value for this project. The Board of Public Works approved the contract on February 15th, 2017.
