Resolution Number: 76301 Work Order: 76301

THIS AGREEMENT is by and between the <u>Board of Public Works of the City of Fort Wayne</u>, <u>Indiana</u> (hereinafter called Owner) and <u>API Construction Corporation</u> (hereinafter called Contractor).

Owner and Contractor, in consideration of the mutual covenants hereinafter set forth, agree as follows:

ARTICLE 1 - WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows:

This project will include the construction of 650 linear feet of 42 to 60-inch consolidation sewer, 40 linear feet of 12-inch sanitary sewer, 1,010 linear feet of 12 to 60-inch storm sewer, a new outfall structure and 250 linear feet of 12 to 16-inch water main replacement. In the future, the consolidation sewer will collect sewage from CSO 032 and connect to a tunnel drop shaft. The tunnel will then transport these flows to the Water Pollution Control Plant's Wet Weather Ponds. This will bring CSO 032 into compliance of 4 overflows events per typical year.

The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty), Contractor shall pay Owner \$2500.00 for each day that expires after the time specified in Paragraph 4.02 above for Milestones and Substantial Completion until the Work is substantially complete. RE:

Harrison Street Utility Improvements

Resolution/Work Order #76301

Council District #5

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: "Harrison Street Utility Improvements" as follows: This project will include the construction of 650 linear feet of 42 to 60-inch consolidation sewer, 40 linear feet of 12-inch sanitary sewer, 1,010 linear feet of 12 to 60-inch storm sewer, a new outfall structure and 250 linear feet of 12 to 16-inch water main replacement. In the future, the consolidation sewer will collect sewage from CSO 032 and connect to a tunnel drop shaft. The tunnel will then transport these flows to the Water Pollution Control Plant's Wet Weather Ponds. This will bring CSO 032 into compliance of 4 overflows events per typical year.

Implications of not being approved: This work is an integral part of compliance with the Consent Decree, to reduce combined sewer overflows to the St. Mary's River. If not constructed, Combined Sewer Overflows will continue at a higher level into the St. Mary's River, thus violating our consent decree obligation and time commitment for reduction. This project is also being coordinated with the Riverfront Phase 1A to make sure the underground infrastructure is completed before street improvements are completed on Harrison Street.

If Prior Approval is being Requested, Justify: N/A

This project was advertised to contractors on July 21, 2017, July 28, 2017 in the Journal Gazette and the News Sentinel and July 26, 2017 in Frost Illustrated, Inc.

The contract for Resolution #76301 awarded to API Construction for \$3,066,965,00 was the lowest most responsive bidder of 5 bidders and was 32% above the Engineer's estimate of \$2,217,960.00. The second lowest bidder was \$155,528.00 above API Construction's bid.

The cost of said project funded by Sewer SRF Bond.
