BILL NO. S-19-04-18

SPECIAL ORDINANCE NO. S-

AN ORDINANCE approving PROFESSIONAL ENGINEERING SERVICES CONTRACT - CSOCM09 CSO 054 EQUALIZATION FACILITY - WORK ORDER #76599 - \$170,000.00 between DONOHUE & ASSOCIATES, INC. and the City of Fort Wayne, Indiana, in connection with the Board of Public Works.

NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA:

SECTION 1. That the PROFESSIONAL ENGINEERING SERVICES CONTRACT - CSOCM09 CSO 054 EQUALIZATION FACILITY - WORK ORDER #76599 by and between DONOHUE & ASSOCIATES, INC. and the City of Fort Wayne, Indiana, in connection with the Board of Public Works, is hereby ratified, and affirmed and approved in all respects, respectfully for:

All labor, insurance, material, equipment, tools, power, transportation, miscellaneous equipment, etc., necessary for: Sewer Project will provide 100,000 gallons of storage as part of efforts to reduce untreated CSOs to local waterways. Sewer Project is an integral part of compliance with the Consent Decree requirements of CSO Control Measure (CM) 9 for CSO Outfall 054:

involving a total cost of not to exceed ONE HUNDRED SEVENTY AND 00/100 DOLLARS - (\$170,000.00). A copy of said Contract is on file with the Office of the City Clerk and made available for public inspection, according to law.

1	SECTION 2. That this Ordinance shall be in full force and effect from
2	and after its passage and any and all necessary approval by the Mayor.

PROFESSIONAL SERVICES AGREEMENT

CSOCM09 CSO 054 EQUALIZATION FACILITY

("PROJECT")

This Agreement is by and between

CITY OF FORT WAYNE ("CITY")

by and through its

Board of Public Works City of Fort Wayne Citizens Square 200 East Berry, Suite 240 Fort Wayne, IN 46802

and

Donohue & Associates, Inc. ("ENGINEER") 1502 Magnavox Way, Suite 260 Fort Wayne, IN 46804

Who agree as follows:

CITY hereby engages ENGINEER to perform the services set forth in Part I - Services ("Services") and ENGINEER agrees to perform the Services for the compensation set forth in Part III - Compensation ("Compensation"). ENGINEER shall be authorized to commence the Services upon execution of this Agreement and written authorization to proceed from CITY. CITY and ENGINEER agree that these signature pages, together with Parts I-IV and attachments referred to therein, constitute the entire Agreement ("Agreement") between them relating to the Project.

APPROVALS

APPRUVED	FOR CITY
BOARD OF	PUBLIC WORKS
BY:	Shan Gunawardena, Chair
	Shan Gunawardona, Gran
BY:	Kumar Menon, Member
BY:	Niche and
	Mike Avila, Member
ATTEST:	Michelle Kulk-Vondran, Clerk
DATE:	4./6.19
APPROVED	FOR ENGINEER
BY:	James J. Hurst, Vice President
DATE:	April 11, 2019

PART I

SCOPE OF BASIC ENGINEERING SERVICES

A. GENERAL

ENGINEER shall provide the CITY with professional engineering services in all phases of the Project to which this scope of services applies. These services will include serving as the CITY professional representative for the Project, providing professional engineering consultation and advice, furnishing civil engineering services and other customary services incidental thereto.

B. PROJECT DESCRIPTION

This Project includes design services, bidding assistance and services during construction for a new wet weather combined sewage storage facility to bring CSO #054 into compliance and meet the requirements of no more than four (4) overflows events per typical year.

The ENGINEER'S approach includes preparation of a Technical Memorandum that focuses on confirming the 100,000-gallon storage volume configuration, materials of construction, associated structures, and basic design elements of the facilities. ENGINEER will work with the CITY to refine the design elements of the proposed facilities using CITY-defined design preferences, standards and volumetric safety factors. The CITY-approved Tech Memo will become the basis of design for the stormwater system improvements. ENGINEER has based the design scope and fee structure on the selection of a large box culvert storage structure that complies with the most-recent elevation information provided by the CITY, with a gravity-in/gravity and partial pump-out (for sump cleaning) configuration. Based on current information, ENGINER believes that a properly size box culvert and sump structure can be located in Roosevelt Street with only moderate utility relocation impact and no additional easement and/or right-of-way acquisition. ENGINEER also understands that floatables capture and flushing capabilities are required for the improvements. ENGINEER has included an additional scope item in the "Optional Additional Services" Section to include public outreach graphics and technical support, and additional utility relocation design services if needed.

ENGINEER has also based the scope and fee detailed below on the following assumptions:

- No additional cast-in-place "side" storage will be required in addition to the precast and cast-in-place storage sewer sized for 100,000 gallons of wet weather volume.
- 2. Passive odor control will be included in the current configuration, and the design will be configured to accommodate a future active (powered) odor control system if deemed necessary.
- 3. Small volume pumping facilities will be required for complete sump dewatering at the end of each storage and self-flushing cycle.
- 4. All Project work will be in CITY-controlled public right-of-way or current easements; only a small portion of the CITY-owned parcel on the northwest corner of Mt. Vernon and Roosevelt will be utilized for pump electrical, controls and passive odor control elements. Therefore, no property or easement acquisition services are anticipated for the Project.

C. SCOPE OF SERVICES

The duty of the ENGINEER is to develop final construction documents which include drawings, specifications and soils report. The final construction drawings and specifications shall be sealed by a registered Professional Engineer, licensed in the state of Indiana and employed by the ENGINEER. The ENGINEER shall develop and provide the following services:

Task 1-Project Schedule, Review Meetings and Project Management

- 1A.1 Prepare project design schedule. ENGINEER shall send an email update by the end of the day each Friday as to what work was performed that week and what work is projected for the upcoming week.
- 1A.2 Conduct and document a Kickoff meeting with CITY staff at CITY'S office.
- 1A.3 Conduct and document three (3) design review meetings. Two (2) meetings are proposed as teleconferences and one (1) meeting is proposed at the City's office, to specifically include a 30% teleconference, a 60% teleconference, and a 95% on-site design review meeting.
- 1A.4 Develop and submit the meeting minutes of the Kickoff and Progress Meetings, and distribute these minutes within 7 days of the respective meetings. A total of six (6) meetings are included in the scope of work, to include the Kickoff Meeting, three (3) design review meetings, the Pre-Bid Meeting, and the Pre-Construction Meeting.
- 1A.5 Project Management including monthly project summaries, project cash flow analysis and Risk Development and Management analysis. Risk Development and Management shall entail preparation of potential project risks that may be encountered during project design and construction. The list of risks will be shared with the CITY for review and input. The ENGINEER and the CITY will rank and develop mitigation measures for high-risk items. The identified mitigation measures will be incorporated in the overall project tasks, schedule and budget.

Task 2A - Preliminary Design Field Survey Coordination

Field survey shall establish a site and topographic survey of the project area and areas which are relevant to the design of the project (i.e. roadway, right-of-way, etc.) and appropriate information. ENGINEER shall:

- 2A.1 Plan, coordinate, monitor and document project-surveying activities.
- 2A.2 Obtain available right-of-way, easement, property and section corner information from local and State agencies.
- 2A.3 Send out survey notices and coordinate with utility companies to locate underground utilities in field and to obtain utility plans. PROGRAM MANAGER will provide a signed property owner notice to send out to property owners. Surveying is not to begin until notices are sent out and has been coordinated with City Utilities Engineering or its Representatives.
- 2A.4 Perform field survey in sufficient detail to obtain the following information, at a minimum:
 - Survey limits shall include the limits of the right-of-way and 15' on either side of the right-of
 way and adjacent ground elevations. A portion of the CITY-owned parcel will also be
 surveyed.
 - 2. All located utilities, including towers, poles, pedestals, manhole covers, vault lids, valve box covers, meter box covers, service box covers, cleanouts, and fire hydrants (including size, locations, material and depth if known.
 - 3. Storm sewers, including invert and rim elevations, SIP identification number, and size and type of pipe (including outfall structures).
 - 4. Sanitary sewers, including invert and rim elevations, SIP identification number, and size and type of pipe (including outfall structures).

- 5. Individual trees larger than 6-inch diameter.
- 6. Tree groups, shrubs, gardens, decorative rocks or stones.
- 7. Fences.
- 8. Edges of pavement for all neighborhood streets and sidewalks within the survey limits.
- 9. Limits of all buildings, appurtenances, structures located adjacent to the facility within the survey limits.
- 10. Limits of existing channel banks, centerline and bottom of channel, ponds, lakes and streams and water's edge elevations.
- 11. Locations and elevations of on-site benchmarks.
- 12. Property lines, lot lines, right-of-way lines and easement lines.
- 13. Street signs (including names), traffic signals, curbs, signs and driveway.
- 14. Headwalls or retaining walls, and bridges and culverts.
- 2A.5 Engineer shall establish a minimum of one (1) permanent benchmark and two (2) additional onsite temporary benchmarks in the form of capped rebar to be used for horizontal and vertical control during construction (1983 State Plan Coordinate System, Indiana 1301, Eastern Zone and 1988 National Geodetic Vertical Datum).
- 2A.6 Engineer shall provide survey data in electronic format with 8 1/2" x 11" printouts of the points, and provide PROGRAM MANAGER with electronic copies of field notes and plats.

Task 2B - Preliminary Design Soil Investigation

- 2B.1 ENGINEER shall provide soil-boring/testing services for a maximum of three (3) soil borings for proposed storage sewer. The Services shall include furnishing all labor, materials, and equipment necessary for the complete and satisfactory taking soil borings for the Project.
- 2B.2 ENGINEER shall submit names of local subconsultants for geotechnical work to Program Manager for approval prior to issuing a notice-to-proceed.
- 2B.3 Soil borings shall be staked/painted on pavement for location by ENGINEER prior to boring. ENGINEER shall deliver complete geotechnical report of all soil boring data, including but not limited to complete boring logs, pipe and/or structure foundation recommendations, trench stability/support recommendations and groundwater construction management recommendations, with preliminary plans for review. Soil boring data shall be included on drawings and with contract bid documents.
- 2B.4 All pavement cores shall be performed by CITY Transportation Department and coordinated through Program Manager.

Task 2C - Technical Memorandum

- 2C.1 Collect current infrastructure data, relevant wet weather flow volume information, and existing survey, easement and right-of-way documentation.
- 2C.2 Evaluate current data, identify remaining data gaps, and request and assess any additional information needed for the Technical Memorandum.
- 2C.3 Evaluate gravity and pumping alternatives.
- 2C.4 Evaluate materials of construction for in-line alternative.

- 2C.5 Evaluate associated facility and structure configurations.
- 2A.6 Combine collected survey and geotechnical data together with collected facility and design configuration elements to develop the recommended design for the wet weather infrastructure improvements, and collate into the Technical Memorandum.
- 2A.7 Perform internal quality review of Technical Memorandum.
- 2A.8 Incorporate quality review modifications into the Technical Memorandum that evaluates and recommends the best value for the reduction in CSO flow from this sub-basin.
- 2A.9 Deliver Technical Memorandum to CITY for as the reference basis for design of the recommended infrastructure.

Task 2D - 30% Preliminary Design

- 2D.1 Notify Program Manager of potential environmental permits required for the project (i.e. IDEM Rule 5 Submission and IDEM Sanitary Permit, etc.). No other permits are anticipated for this Project.
- 2D.2 Research CITY documents for existing mapping, utility information, record drawings, aerials, right-of-way and lot base maps, information management system and other pertinent data.
- 2D.3 Identify major utilities and their approximate location from utility maps. This will include identifying size and type of material of the utility main. Assist CITY with coordination with other utilities such NIPSCO, AEP, Verizon, Frontier, etc. as necessary.
- 2D.4 Coordinate with CITY on conflicts with any other proposed projects in the immediate area.
- 2D.5 Coordinate with CITY on CITY's activities to contact all utility companies and have the underground utilities field marked along the selected route. (Coordinate with IUPPS 1-800-382-5544)
- 2D.6 30% Preliminary construction drawings shall include:
 - A. Cover sheet with Project title, Project work order number, location map, and description of the Project limits, signature blocks, sheet index, list of utility owners and addresses, and north arrow.
 - B. Typical cross sections, if necessary for the Project, should show basic configuration, design features such as pavement restoration type, curbs, sidewalk, and cross sections.
 - C. The following information should be included in the plan and profile sheets:
 - o show the preliminary proposed design information;
 - o show the existing topography and site conditions;
 - o label the existing street names;
 - o show the beginning and ending stations for the Project in plan and profile view with stationing 0+00 at the beginning of the Project;
 - o north arrow in the upper, right hand corner of the drawing and graphic scale;
 - o label the existing right-of-way, property lines, and easements;
 - o label the horizontal/construction line alignment with stationing;
 - o show the existing ground under the horizontal/construction line alignment (profile) with existing and proposed elevations clearly labeled;

- o label all existing structures for sanitary, storm, and water main using CITY ID's that correspond to the CITY's GIS maps
 (GIS maps can be found at the following locations:

 http://maps.cityoffortwayne.org/map_library/mapbook_sewer/zz_index.asp & http://maps.cityoffortwayne.org/map_library/mapbook_water/zz_index.asp);
- o label all crown and invert elevations, pipe size, and flow direction for existing structures (sanitary, storm, or water main);
- o identify the existing trees and existing ADA ramps to be affected by proposed design;
- o show the preliminary dimensions for pavement widths and radii at street intersections; and
- o show pipe materials as applicable.
- o Soil Erosion Control Plan
- Stormwater Management Plan
- o Bypass Pumping Plan
- 2D.7 Compute Project quantities and estimate of construction costs.
- 2D.8 Develop an outline of technical specifications to be developed by 60% design.
- 2D.9 Perform internal quality review of 30% Preliminary Design Documents.
- 2D.10 Furnish two complete sets (1 hard copy and 1 pdf) of the 30% Preliminary Design Submittals to the Program Manager for review and approval. After a review meeting with the Program Manager, incorporate any necessary changes.

Preliminary Design Submittals: (2 Complete Sets)

- Technical Memorandum Best value gravity sewer pipe.
- 30% Preliminary Design Drawings
- Project Quantities w/estimated construction costs
- Table of Contents of Specifications
- 2D.11 The 30% Preliminary Design Drawings and support documentation submitted for review shall be marked with "Not for Construction" and "First Submittal".
- 2D.12 Incomplete submittals will not be accepted and/or reviewed by the Program Manager.

Task 2E - 60% Intermediate Design

- 2E.1 Assist the CITY in resolving any utility conflicts.
- 2E.2 Determine the final location of the proposed improvements and any temporary or permanent easement requirements.
- 2E.3 60% Intermediate Design Drawings. Incorporate all design improvements presented in 30% review meeting.

The Drawings will generally include: (estimated)

	Sheets
Title Sheet	1
General Notes, Index and Legend	1
Survey Control Data Sheet	1
Traffic Control Sheets	3

Plan and Profile Sheets	2
Erosion Control Plan Sheets	2
Restoration Plan Sheets	2
Structure Data Table	1
Special Detail Sheets	3
TOTAL	16

The following information should be included in the Plan and Profile sheets:

- o label the alignment with stationing along the construction line with tic marks every 100 feet;
- verify that the beginning and ending stations for the project in plan and profile view have not changed;
- o show the dimension widths of pavement lane(s), curb and gutter, parkway strip, and sidewalk:
- o show the limits of reconstruction for public road approaches and driveways;
- o show the proposed ditch grading in profile view;
- o show the new sidewalks, curb, and ADA ramps;
- show the limits of the proposed easement and property owner's names and addresses (if applicable);
- o show the proposed storm sewer, sanitary sewer, and water main locations with outlet locations clearly identified in the plan and profile views;
- label all crown and invert elevations, pipe size, flow direction and coordinates for existing and proposed storm sewer and sanitary sewer in profile view;
- o show the existing and proposed locations for water mains in profile view;
- label structures with stationing and offset distance from the construction line in plan view for proposed and existing storm sewer(s) and sanitary sewer(s);
- show the survey control points and benchmarks;
- o label all signs and mailboxes to be removed and reset;
- o label all castings to be adjusted;
- o label all trees to be protected or removed;
- o show the north arrow and drawing scale;
- o update construction limits; and
- o show proposed legend in plan view.
- 2E.4 Prepare draft specifications for the improvements, including bid schedule, measurement and payment specifications, special provisions and necessary details to supplement CITY Standards.
- 2E.5 Compute Project quantities and estimate of construction costs.
- 2E.6 Perform internal quality review of 60% Intermediate Design documents.
- 2E.7 Submit draft 60% Intermediate Design Submittals to Program Manager for review and approval.

Intermediate Design Submittals: (2 Complete Sets) 60% Intermediate Design Drawings
Updated Project Quantities w/estimated construction costs
Draft of Project Specifications in 2004 Master Format

2E.8 Upon approval of 60% Intermediate Design Drawings, submit one copy for "routings" along with a list of all projected affected entities. Program Manager will make additional copies of drawings and perform routing. Routing comments and revisions will be forwarded to ENGINEER at the review meeting.

- 2E.9 The 60% Intermediate Design Drawings and support documentation submitted for review shall be marked with "Not for Construction" and "Second Submittal".
- 2E.10 Incomplete submittals will not be accepted and/or reviewed by the Program Manager.
- 2E.11 Furnish to the Program Manager all completed permit applications (including supporting documentation) ready for signatures and submittal to governing agencies. Any permit fees shall be paid for by the ENGINEER and reimbursed at cost by the CITY. Assist the Program Manager as reasonably requested, in obtaining regulatory and agency reviews and approvals for the Project, including attending up to two (2) meetings with reviewing agencies. Services shall include preparation, submittal to required agencies and coordination of the project's SWPP. Although not anticipated, other permits such as Construction in a Floodway permit, wetland delineation and restoration plans, US Fish and Wildlife clearances, if required, will be performed under Optional Additional Services.

Task 3A - 95% Pre-Final Design & 100% Final Design

- 3A.1 Conduct and document a review meeting at the end of 95% Pre-Final Design (95% Draft Drawings). This meeting will be held at the Program Manager's office.
- 3A.2 Develop and submit the minutes of the 95% Pre-Final Design Progress Review Meeting and distribute these minutes within 7 days of the Review Meeting.
- 3A.3 Prepare the 95% Pre-Final Design & Final Specifications for the improvements, including bid and proposal instructions/forms, measurement and payment specifications, special provisions and necessary details to supplement CITY standards. ENGINEER shall coordinate with Program Manager to incorporate CITY Standard Specifications into the Project's specifications.
- 3A.4 Prepare 95% Pre-Final Design & Final Design Drawings. Incorporate comments received during the review meetings and routings.
- 3A.5 Update summary of project quantities with estimated construction costs for both the 95% Pre-Final & Final Specifications.
- 3A.6 Complete a quality control review of the draft Contract Documents.
- 3A.7 Submit 95% Pre-Final Design & Final Design Submittals to Program Manager for review and approval.

95% Pre-Final Design & 100% Final Design Submittals: (2 Complete Sets)

95% Pre-Final Design & Final Design Drawings

95% Pre-Final Design & Final Project Quantities with estimated construction costs

95% Pre-Final Design & Final Bidform

95% Pre-Final Design & Final Project Specifications

- 3.A.8 The 95% Pre-Final Design Drawings and support documentation submitted for review shall be marked with "Not for Construction" and "Third Submittal".
- 3A.9 Upon approval of 95% Pre-Final Design Drawings and Project Specifications, prepare and submit Final Design Drawings with one (1) set of sealed paper bond drawings, two (2) electronic

versions of sealed detail technical specifications (1 Microsoft Word and 1 pdf) and two (2) electronic copy of Project Drawings (AutoCAD and 1pdf).

Task 3B - Bidding Phase

The bidding phase services shall include the following:

- 3B.1 Attend and provide technical assistance to CITY for Pre-bid Meeting.
- 3B.2 Assist with addenda, as needed, to interpret, clarify or expand bidding documents. CITY'S Program Manager will issue the Addenda.
- 3B.3 Conformed to Contract Documents:

 The ENGINEER will prepare a complete set of Contract Documents (drawings and specifications) incorporating all issued addenda after execution of the Construction Agreement by the CITY and CONTRACTOR. These "Conformed to Contract" (CTC) set of Contract Documents shall contain revisions that incorporate specific changes made by addenda, full counterpart copies of the addenda and accepted bid proposal. Submit two (2) electronic versions of CTC project drawings in both PDF and DWG file format or latest version (AutoCAD) and two (2) electronic copies of the CTC project specifications (Microsoft Word & pdf).

Task 4-Property Acquisition (Optional Additional Service)

No property acquisition is contemplated at this time for the Project; however, if property acquisition is required for the Project, services shall conform to GR7 Easements in the City Utilities Design Standards Manual (http://www.cityoffortwayne.org/utilities/images/stories/designman/GR7_Easements - Draft.pdf):

- 4.1 Prepare a summary of required property acquisition as described under GR7.02.
- 4.2 Complete easement descriptions and easement plats as described under GR7.06 and GR7.07. (If needed, assumed property acquisition required for 6 parcels)
- 4.3 Develop a property acquisition summary sheet as described under GR7.11.

Task 5 - Construction Phase

- 5.1 ENGINEER shall attend and provide technical assistance to CITY for the Pre-construction Meeting.
- 5.2 ENGINEER shall visit Project sites during construction as needed to answer questions from Program Manager, CITY's resident project representative, or Contractor, for a maximum of five (5) construction site visits.
- 5.3 ENGINEER shall process and review shop drawings and Requests for Information (RFIs) submitted by the Contractor. The review process for each shop drawing or RFI shall be completed within a two (2) week time period. Review Contractor submitted shop drawings for compliance with Contract Documents, as requested by Program Manager. Review shall be to assess if the items covered by the submittals will, after installation or incorporation, conform to the Contract Documents and be compatible with the overall design intent. Review and approval will not extend to means, method, techniques, sequences or procedures of, or to safety precautions, procedures, or programs incident thereto. ENGINEER shall be available to answer questions as they pertain to the drawings and specifications throughout

construction of the Project.

- 5.4 ENGINEER shall utilize the City of Fort Wayne's Project Management Information System (PMIS) document system for construction management.
- 5.5 ENGINEER shall not be responsible for the acts or omissions of the Contractor, or of any subcontractors, suppliers, or other individuals or entities performing or furnishing any of the Work. ENGINEER shall not be responsible for the failure of the Contractor to perform or furnish the Work in accordance with the Contract Documents.
- 5.6 ENGINEER shall prepare Final Record Drawings using the guidelines under the City Utilities Standards Manual Final Record Drawings GR10. City Utilities Engineering will provide two sets of project drawings designated for recording changes and deviations from the original project drawings to the contractor. Record drawings will be produced based on the record of work provided by the contractor and Resident Project Representative (RPR) to CITY.

DATE

D. SCHEDULE

SCHEDIII E

The Project shall be completed per attached design schedule. This schedule is based on receiving a Notice to Proceed by May 20, 2019, and receiving prompt review and approvals from CITY agencies and Program Manager.

SCHEDOLL	DILLI
Task 2A: Preliminary Design Field Survey Coordination	July 1, 2019
Task 2B: Preliminary Design Soil Investigation	July 1, 2019
Task 2C: Technical Memorandum	August 2, 2019
Task 2D: 30% Preliminary Design	September 27, 2019
Task 2D: 60% Intermediate Design	November 20, 2019
Task 3A: 95% Pre-Final Design & 100% Final Design	January 10, 2020
Task 3B: Bidding Phase (Advertise)	January 24, 2020
Task 4: Property Acquisition (if needed)	2 January 24, 2020
Task 5: Construction Phase	TBD

(1) If needed, initiate Task 4 upon approval of Task 2D: 60% Preliminary Design

E. OPTIONAL ADDITIONAL SERVICES

Upon separate written authorization by the CITY and after approval of negotiated fees, ENGINEER may provide the following additional services:

PUBLIC OUTREACH TECHNICAL SUPPORT

ENGINEER will provide technical support, graphics development and attendance at one (1) public meeting with CITY.

ADDITIONAL UTILITY RELOCATION

ENGINEER shall provide additional engineering services for the design of relocated underground utilities if survey and/or geotechnical findings dictate, or if the CITY determines that relocation is desired.

OTHER CONTINGENCY TASKS (but not specifically limited to):

- Attend additional meetings as needed to review and discuss the Project.
- Perform site visits to assist CITY'S Program Manager in resolution of design or construction problems.
- Technical support for potential utility locational services (potholing).
- Design of miscellaneous utility replacement pipes within project area as directed by the CITY.
- Assistance with permitting beyond IDEM and SWPP permits.

PART II

CITY'S RESPONSIBILITIES

CITY shall, at its expense, do the following in a timely manner so as not to delay the services:

A. INFORMATION REPORTS/CITY UTILITY MAPS/AERIAL MAPS/CONTOUR MAPS

Make available to ENGINEER reports, studies, regulatory decisions and similar information relating to the Services that ENGINEER may rely upon without independent verification unless specifically identified as requiring such verification.

Provide ENGINEER with a maximum of two (2) copies each of existing CITY utility maps, aerial maps and contour maps that are readily available at Citizen's Square.

Provide ENGINEER with electronic copies of ortho aerial photography, GIS base map information (AutoCAD format) on right-of-way and lot information, and GIS information on existing water and sewer lines (AutoCAD format).

B. DESIGN PHASE

- o Coordinate with other CITY projects and approvals.
- o Approve soil boring location plan.
- o Submit permit applications.
- o Provide recent City of Fort Wayne bid tabulations for similar projects.
- o Land acquisition services.
- o Prepare front-end specifications/bid documents.

C. BID PHASE

- Reproduce and distribute bid documents during bid phase.
- o Prepare and distribute Pre-Bid Meeting Minutes.
- o Prepare and distribute Addenda
- o Review and evaluate the bids received and prepare bid tabulation.

D. CONSTRUCTION PHASE

o Provide training on CITY'S Project Management Information System (PMIS)

E. REPRESENTATIVE

Designate a representative for the Project who shall have the authority to transmit instructions, receive information, interpret and define CITY's requirements and make decisions with respect to the Services. The CITY representative for this Agreement will be Michael Saadeh, EI (CITY'S Project Manager).

F. DECISIONS

Provide all criteria and full information as to CITY's requirements for the Services and make timely decisions on matters relating to the Services.

PART III

COMPENSATION

A. COMPENSATION

Compensation for services performed in accordance with Part I — Scope of Basic Engineering Services of this Agreement will be based on hours actually spent and expenses actually incurred with a not-to-exceed engineering fee of $\underline{\$170,000.00}$ as summarized in Attachment # 1.

ENGINEER's costs will be based on the hours incurred to complete the Project times the hourly rates of the various personnel, per Attachment #2 – Employee Hourly Rate Schedule. All reimbursable costs incurred for the Project will be invoiced at actual cost.

Payment for outside consulting and/or professional services such as geotechnical, utility location services, registered Land Surveyor for easement preparation, or legal services shall be performed by a Subconsultant at actual cost to ENGINEER plus 10 percent for administrative costs. The ENGINEER will obtain written CITY approval before authorizing these services.

B. BILLING AND PAYMENT

1. Timing/Format

- a. ENGINEER shall invoice CITY monthly for Services completed at the time of billing. Such invoices shall be prepared in a form and supported by documentation as CITY may reasonably require.
- b. CITY shall pay ENGINEER within 30 days of receipt of approved invoice.

2. Billing Records

ENGINEER shall maintain accounting records of its costs in accordance with generally accepted accounting practices. Access to such records shall be provided during normal business hours with reasonable notice during the term of this Agreement and for 3 years after completion.

STANDARD TERMS AND CONDITIONS

- STANDARD OF CARE. Services shall be performed in accordance with the standard of professional practice ordinarily exercised by the applicable profession at the time and within the locality where the services are performed. No warranty or guarantee, express or implied, are provided, including warranties or guarantees contained in any uniform commercial code.
- 2. CHANGE OF SCOPE. The scope of Services set forth in this Agreement is based on facts known at the time of execution of this Agreement, including, if applicable, information supplied by ENGINEER and CITY. ENGINEER will promptly notify CITY of any perceived changes of scope in writing and the parties shall negotiate modifications to this Agreement.
- SAFETY. ENGINEER shall establish and maintain programs and procedures for the safety of its employees. ENGINEER specifically disclaims any authority or responsibility for general job site safety and safety of persons other than ENGINEER employees.
- 4. DELAYS. If events beyond the control of ENGINEER, including, but not limited to, fire, flood, explosion, riot, strike, war, process shutdown, act of God or the public enemy, and act or regulation of any government agency, result in delay to any schedule established in this Agreement, such schedule shall be extended for a period equal to the delay. In the event such delay exceeds 90 days, ENGINEER will be entitled to an equitable adjustment in compensation.
- 5. TERMINATION/SUSPENSION. Either party may terminate this Agreement upon 30 days written notice to the other party in the event of substantial failure by the other party to perform in accordance with its obligations under this Agreement through no fault of the terminating party. CITY shall pay ENGINEER for all Services, including profit relating thereto, rendered prior to termination, plus any expenses of termination.

ENGINEER or CITY, for purposes of convenience, may at any time by written notice terminate the services under this Agreement. In the event of such termination, ENGINEER shall be paid for all authorized services rendered prior to termination including reasonable profit and expenses relating thereto.

- 6. REUSE OF PROJECT DELIVERABLES. Reuse of any documents or other deliverables, including electronic media, pertaining to the Project by CITY for any purpose other than that for which such documents or deliverables were originally prepared, or alternation of such documents or deliverables without written verification or adaptation by ENGINEER for the specific purpose intended, shall be at CITY's sole risk.
- 7. OPINIONS OF CONSTRUCTION COST. Any opinion of construction costs prepared by ENGINEER is supplied for the general guidance of the CITY only. Since ENGINEER has no control over competitive bidding or market conditions, ENGINEER cannot guarantee the accuracy of such opinions as compared to contract bids or actual costs to CITY.
- 8. RELATIONSHIP WITH CONTRACTORS. ENGINEER shall serve as CITY's professional representative for the Services, and may make recommendations to CITY concerning actions relating to CITY's contractors, but ENGINEER specifically disclaims any authority to direct or supervise the means, methods, techniques, sequences or procedures of construction selected by CITY's contractors.
- MODIFICATION. This Agreement, upon execution by both parties hereto, can be modified only by a written instrument signed by both parties.
- 10. PROPRIETARY INFORMATION. Information relating to the Project, unless in the public domain, shall be kept confidential by ENGINEER and shall not be made available to third parties without written consent of CITY.
- 11. INSURANCE. ENGINEER shall maintain in full force and effect during the performance of the Services the following insurance coverage; provided, however, that if a High Risk Insurance Attachment is attached hereto, the requirements of the High Risk Insurance Attachment shall be substituted in lieu of the following requirements;
 - a) Worker's Compensation per statutory requirements
 - b)General Liability \$1,000,000 minimum per occurrence/ \$1,000,000 aggregate (if the value of the projects exceeds \$10,000,000 then this shall be \$5,000,000 aggregate).
 - c) Automobile Liability \$1,000,000 per occurrence
 - d) Products Liability \$1,000,000 per occurrence
 - e) Completed Operations Liability \$1,000,000 minimum per occurrence

The Certificate of Insurance must show the City of Fort Wayne, its Divisions

- and Subsidiaries as an Additional Insured and a Certificate Holder, with 30 days notification of cancellation or non-renewal. All Certificates of Insurance should be sent to the following address:
 City of Fort Wayne Purchasing Department
 200 East Berry Street, Suite 490
 Fort Wayne, IN 46802
- 12. INDEMNITIES. To the fullest extent permitted by law, ENGINEER shall indomnify and save harmless the City from and against loss, liability, and damages sustained by CiTY, its agents, employees, and representatives by reason of injury or death to possons or damage to tangible property to the extent caused directly by the negligent errors or omissions of ENGINEER, its agents or employees.
- 13. LIMITATIONS OF LIABILITY. Each party's liability to the other for any loss, cost, claim, liability, damage, or expense (including attorneys' fees) relating to or arising out of any negligent act or omission in its performance of obligations arising out of this Agreement, shall be limited to the amount of direct damage actually incurred. Absent gross negligence or knowing and willful misconduct which causes a loss, neither party shall be liable to the other for any indirect, special or consequential damage of any kind whatsoever.
- 14. ASSIGNMENT. The rights and obligations of this Agreement cannot be assigned by either party without written permission of the other party. This Agreement shall be binding upon and insure to the benefit of any permitted assigns.
- ACCESS. CITY shall provide ENGINEER safe access to any premises necessary for ENGINEER to provide the Services.
- 16. PREVAILING PARTY LITIGATION COSTS. In the event any actions are brought to enforce this Agreement, the prevailing party shall be entitled to collect its litigation costs from the other party.
- 17. NO WAIVER. No waiver by either party of any default by the other party in the performance of any particular section of this Agreement shall invalidate another section of this Agreement or operate as a waiver of any future default, whether like or different in character.
- 18. SEVERABILITY. The various term, provisions and covenants herein contained shall be deemed to be separate and severable, and the invalidity or unenforceability of any of them shall not affect or impair the validity or enforceability of the remainder.
- 19. AUTHORITY. The persons signing this Agreement warrant that they have the authority to sign as, or on behalf of, the part for whom they are signing.
- 20. STATUTE OF LIMITATION. To the fullest extent permitted by law, parties agree that, except for claims for indemnification, the time period for bringing claims regarding ENGINEER's performance under this Agreement shall expire one year after Project Completion.
- 21. CONSENT DECREE NOTIFICATION. ENGINEER shall perform, or cause others to perform, all services undertaken in connection with this Agreement in a good and workman-like manner and in conformance with the terms of the Consent Decree entered in the U.S. District Court on April I, 2008 by the United States and Stato of Indiana. ENGINEER acknowledges that it has been provided a complete copy of the Consent Decree which can be viewed at: http://www.cityoffortwayne.org/utilities/imnges/stories/docs/consent_decree/Consent_Decree.pdf
- 22. DOCUMENT RETENTION. Notwithstanding any other provision of this Agreement, ENGINEER agrees to preserve all non-identical copies of all documents, records and other information (whether in physical or electronic form) within ENGINEER's possession or control and which relate, in any manner, to the performance of the services undertaken in connection with this Agreement for a period of I year after the completion contemplated by the Agreement (the "Retention Period"). Prior to the end of the Retention Period, or at any earlier time if requested by the CITY, ENGINEER shall provide the CITY with complete copies of such documents, records and other information at no cost to the CITY. The copies shall be provided to the CITY on CD or DVD media, and individual files shall be in Adobe PDF format. The individual files shall be contained in a ZIP formatted file, and the filename of the ZIP shall include the name of the project and the ENGINEER. No part of any file shall be encrypted or protected from copying. Such copies shall be accompanied by a verified written statement from the ENGINEER attesting that it has provided the CITY with complete copies of all documents, records and other information which relates to the service contemplated by the Agreement.

(Vendor Name)

VENDOR DISCLOSURE STATEMENT RELATING TO:

- financial interests;
- 2. POTENTIAL CONFLICTS OF INTEREST;
- 3. CURRENT AND PENDING CONTRACTS OR PROCUREMENTS

Vendors desiring to enter into certain contracts with the City of Fort Wayne, Indiana (the "City") shall disclose their financial interests, potential conflicts of interest and current and pending contract or procurement information as set forth below.

The following disclosures by Vendors are required for all contracts with annual payments by the City in the amount of \$50,000 or more. Vendors shall disclose their financial interests, potential conflicts of interest and other contract and procurement information identified in Sections 1, 2 and 3 below as a prerequisite for consideration for a contract awarded by the City. This Disclosure Statement must be completed and submitted together with the Vendor's contract, bid, proposal or offer.

A publicly traded entity may submit its current 10K disclosure filing in satisfaction of the disclosure requirements set forth in Sections 1 and 2 below.

Section 1: Disclosure of Financial Interest in Vendor

Interoffice Memo

Date:

April 17, 2019

To:

Common Council Members

From:

Michael Saadeh, City Utilities Engineering

RE:

Contract Title: CSOCM09 CSO 054 Equalization Facility W.O. #76599

Council District # District 1

<u>The consultant shall provide:</u> Professional engineering services to provide the design, bid assistance, and design services during construction for the CSO 54 Equalization Facility.

<u>Project Description:</u> The CSO 054 Equalization Facility project is identified in CSO Control Measure No. 9 in the LTCP. This project will provide 100,000 gallons of storage as part of efforts to reduce untreated CSOs to local waterways. After implementation of this project, CSO 054 should be incompliance of four overflow events in a typical year to the St. Marys River.

<u>Implications of not being approved</u>: The purpose of this project is to meet the Consent Decree requirements of CSO Control Measure (CM) 9 for CSO Outfall 054. The CSO CM 9 requires projects under this control measure to be constructed by the end of 2020. This sewer project is an integral part of compliance with the Consent Decree, to reduce combined sewer overflows to the St. Marys River.

If Prior Approval is being Requested, Justify: N/A

Selection and Approval Process:

The consultant was selected through the Competitive Sealed Proposal (CSP) process. The RFQ announcement was sent to over 100 firms and posted on the City website, and six firms submitted a statement of qualifications. Utilities Engineering staff reviewed the qualifications of all interested firms, established a short list of consultants. A request for proposals was then developed and sent to the selected shortlisted firms. Four shortlisted firms submitted Competitive Sealed Proposals. A scoring matrix was used to score all firms based on responses to the RFQ and RFP's. RFP scoring was based on expertise, prior work experiences, qualifications, proposed scope of work and fee. Using this process, Utilities Engineering selected Donohue & Associates for this project and finds their scope and fee to be the best value for this project. The Board of Public Works approved the contract on April 16, 2019.

The cost of the said project is funded by Sewer Revenue.
