From: Jon Weirick, Sr. Program Manager, City Utilities Engineering
RE: **Three Rivers Filtration Plant Generator PLC Replacement
Res. #66756, W.O. #66756**

Council District # N/A – At Plants

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: “(Three Rivers Filtration Plant Generator PLC Replacement)” as follows: (Replacement of generator programmable logic control (PLC) and operator interface terminal (OIT) at Three Rivers Filtration Plant.

Implications of not being approved: Equipment was originally installed in 2005 for the commissioning of the generators at the Three Rivers Filtration Plant. The PLC that operates the generators is part of a furnished skid package by Russ Electric. This PLC monitors and manages the automatic transfer of power between utility electric grid and standby generation. Being proactive in maintenance, City Utilities has established that the current PLC is at the end of its useful life and needs to be replaced. The current equipment was discontinued at the end of 2017.

If Prior Approval is being Requested, Justify: N/A
This project is being procured on a sole-source basis.

The decision to sole source Russ Electric is based on Russ Electric being the original equipment manufacturer and has a direct replacement available to migrate the existing system. Russ Electric will replace the current PLC maintaining the current physical layout to preserve the existing cabinets. This complex process has been regularly performed and the migration of the process controls will be done while keeping the system operational.

Russ Electric field service is the only factory authorized service organization for service, maintenance, and warranty service on Russ Electric equipment. By replacing the PLC with Russ Electric, we have the ability to maintain all switchgear associated with the standby generators as these are integrated and proprietary equipment. This automation system replacement requires special skills by trained and qualified personnel. In order to maintain the utilities developed standardization already implemented, it is imperative to retain the services of Russ Electric.

The contract for Resolution #66756 awarded to (Russ Electric Power Control Systems) for \$238,574.00.

The cost of said project funded by Water Utility.
