First Gear, Inc. processes gears for others, using several types of machines depending on the operation performed. The new CNC Swiss Lathe Machine will be used for the machining of high-precision parts adding to the versatility and diversity in the type of parts that First Gear, Inc. can machine. The new Keopfer Hobbing machine will be used for additional machining capacity to cut gears. Our gear hobbing business volume continues to grow requiring an additional machine. The new Finish Grinder and the Honing machine will support existing business and provide us with the additional capacity needed to continue to grow.

In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA?

New equipment expends our capabilities, allowing us to bring in lathe, hobbing, honing, and grinding work currently outsourced to vendors in Detroit, Chicago, Philadelphia, and Huntington, Indiana allowing us to grow our business and add stability.
