Council District # 2

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project; Orders the internal inspection of 4.4 miles of raw water mains.

Implications of not being approved: The raw water mains that deliver water from the river to the Water Filtration Plant for treatment are important assets for the city's drinking water supply. These two mains, a steel main installed in 1934 and a concrete reinforced main installed in 1954 carry water that enters the City of Fort Wayne drinking water system. Inspection of these mains is important for continued reliability of the city's water supply.

If Prior Approval is being Requested, Justify: N/A

An outside consulting firm, ISLE Inc was retained to seek out viable inspection technologies for water mains of this type and size. Isle's initial research netted a total of 58 technologies that perform some form of pipeline inspections. From that initial list, the City and ISLE narrowed the list down to 5 different technologies, with 4 companies. These 4 companies were sent a Request For Information (RFI). Of the 4 included in the RFI, 2 responded back. These 2 were asked to provide a Request for Proposal (RFP) for the inspection work. The City scored these proposals and selected Pure Technologies to perform the pipeline inspections. Pure's estimated cost for inspection work is \$705,586.44.

The cost of said project funded Water Revenue.
