There has been much talk lately of the "big" and "small" business. It is a very common mistake to think of the "big" business as the one that has the most money and the "small" business as the one that has the least money. In fact, the "big" business is the one that has the most influence and the "small" business is the one that has the most power. The "big" business is the one that has the most money and the "small" business is the one that has the least money. The "big" business is the one that has the most influence and the "small" business is the one that has the most power.

Consistent with my prior studies, citizens are not equally likely to respond to demands for action. For example, citizens are more likely to respond to demands for action when the demands are framed in terms of a specific issue (e.g., "the environment") than when the demands are framed in terms of a general issue (e.g., "the world").
