Describe the product or service to be produced or offered at the project site: The product is affordable housing.

In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA? <u>Property to be designated is a 214 unit income and age restricted affordable housing community with only 26 units currently habitable.</u>

Previous ownership incurred multiple Neighborhood Code building violations some requiring several weeks of fire watch by the FWFD due to non-functioning fire alarm systems. These structures have deteriorated to beyond a substandard level and if these improvements are not made critically needed affordable housing units will be lost.

Arbors of South Towne Square Apartments 7915 Decatur Road Fort Wayne, IN 46816

Project Description

Arbors of South Towne Apartments ('Arbors') entails the acquisition and rehabilitation of an existing 214-unit multifamily elderly (62+) property built in 1974 and rehabilitated in 2007. 212 of the 214 (99%) units currently are under a HUD Housing Assistance Program ('HAP') contract.

Allied's goals to recapitalize and rehabilitate this property include:

- To address the critical needs of this property by repairing and replacing, as necessary, significant mechanical systems such as plumbing and roof.
- To modernize units by installing new appliances, cabinets, countertops, paint, flooring, light fixtures, toilets, plumbing fixtures, tubs and showers, interior doors/hardware, and window treatments;
- To reduce energy consumption at the development and lower utility costs for tenants and owner;
- To increase marketability of the development and provide improved amenities to the residents by repairing deferred maintenance items, modernizing building exteriors and improving common areas and amenities;
- To contribute to the City's vision of preserving affordable housing for Southeastern Fort Wayne residents; and
- To leverage limited resources to ensure the long-term sustainability of this important affordable housing asset.

Relocation

Renovation will be structured so that current residents are minimally disturbed. Due to the high number of vacancies at the Property, it is anticipated that most or all households will be able to be relocated on-site by directly transferring to a renovated unit. If additional units are needed in order to free up an entire stack at the Property, or if there are not sufficient vacancies available that meet a household's needs, households may be temporarily housed at a nearby hotel. Due to the small unit sizes at the Property, all households should be able to be accommodated in a double occupancy room which has sleeping space for four persons.

Development Team

Allied Real Estate Partners, LLC: Developer

Allied and its affiliates specialize in the acquisition, financing, development, construction and management of affordable multifamily properties – creating authentic, balanced communities where individuals and families thrive. Allied works closely with clients, partners and service providers to develop value-add solutions that match the unique characteristics and intended housing goals of each project.

Collectively, the Allied leadership team holds decades of national experience in the affordable housing industry. Building on this experience, the team collaborates with public and private sector partners to enrich communities, provide residents with the high-quality homes, services, and amenities everyone deserves, and inspire neighbors to employ their own potential to effect change.

In the last several years, Allied completed the development and substantial rehabilitation of over 1,600 units across 11 existing affordable properties. Allied secured financing for these deals through the combination of tax-exempt bonds, FHA loan proceeds (under HUD's 221(d)(4) and HUD 223(f) programs), private placement loan proceeds, and 4% and 9% low-income housing tax credits, and a combination of gap financing like HOME, Affordable Housing Trust Fund, Federal Home Loan Bank Affordable Housing Program funds, and many others.

With a sharp focus on understanding the unique needs and assets of every project, Allied implements a careful assessment process that ensures the needs of each project is met and the development team delivers what is promised. Allied's strategy includes the utilization of existing resources, identifying and fostering relationships with residents, businesses, and government agencies, extensive neighborhood research, and developing a resident services plan in tandem with local providers. Allied's approach to affordable housing is unlike most other developers. Our Community Development approach is to work with our nonprofit owners to identify and partner with locally-based service providers who understand the community and will provide the resources families need to become self-sufficient.

Project Financing / Schedule

Arbors Indiana, LLC will submit a tax credit application to Indiana Housing & Community Development Authority (IHCDA). The tax credit application will be requesting allocations of tax exempt bonds, Federal Low Income Housing Tax Credits, State of Indiana Affordable Housing and Workforce Tax Credits, and an ICHDA Development Fund Loan. The project's construction will be funded by tax credit equity and construction loans. There will be a conversion to a permanent, first position, fully amortizing loan.

The project is scheduled to close and start construction by June 2025, with construction completion in approximately December 2026.
