CERTIFICATE OF SURVEY

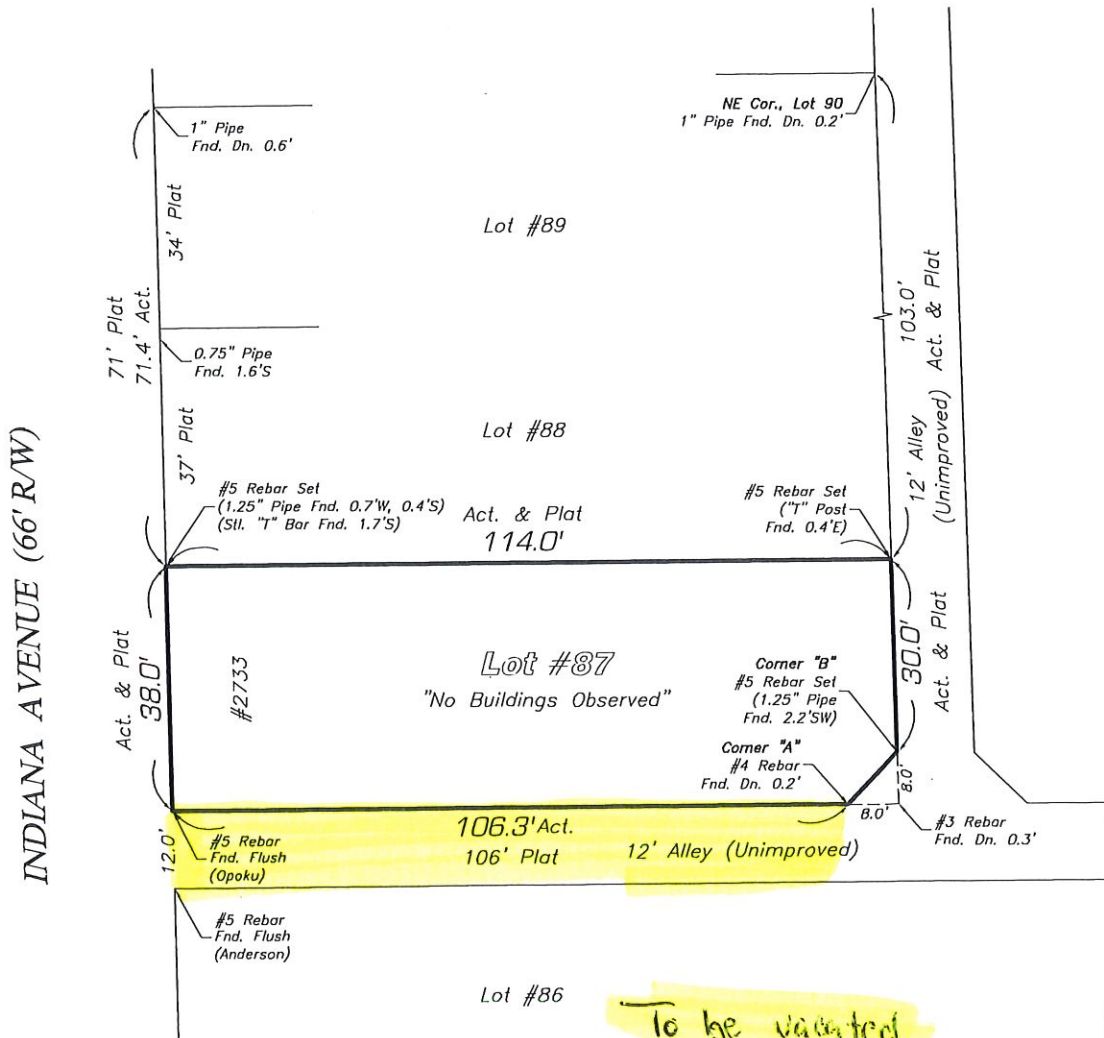

This document is a record retracement survey of real estate prepared under IAC 865 Rule 12 in conformity with established practices of surveying and made in accordance with the records on file in the Office of the Recorder of Allen County, Indiana. The land described exists in full dimensions as shown hereon in feet. It is free from visible encroachments either way across boundary lines unless specifically stated below. Corners were perpetuated as indicated.

RECORD DESCRIPTION: (as described in Document Number 2025042130)

Lot Number 87 of Zollars and Swayne's Addition to the City of Fort Wayne, according to the plat thereof, recorded in Deed Record 101, page 561, in the Office of the Recorder of Allen County, Indiana.

This property appears to lie within Zone X as the description plots by scale on Flood Insurance Rate Map No. 18003C 0292G, effective August 3, 2009.

Survey

SURVEYOR'S REPORT

Prepared as a part of the foregoing survey.

Address: 2733 Indiana Avenue, Fort Wayne, IN 46807

This survey is intended to retrace the record boundaries of Lot Number 87 in Zollars and Swayne's Addition to South Wayne, as recorded in Deed Record 101, page 561, in the Office of the Recorder of Allen County, Indiana.

In Accordance with Title 865, Article 1.1, Chapter 12, Sec. 1 et. seq. of the Indiana Administrative Code, the following observations and opinions are submitted regarding various uncertainties in (a) reference monuments, (b) lines of occupation, (c) record descriptions, and (d) those uncertainties due to random errors in measurement ("relative positional accuracy"). There may be unwritten rights associated with these uncertainties.

REFERENCES: A copy of the following documents were reviewed in completion of this survey:

- The deeds of the subject lot and any adjoining lots, as shown on the plat of survey.
- The plat of Zollars and Swayne's Addition to South Wayne, Deed Record 101, page 561.

(A) AVAILABILITY OF REFERENCE MONUMENTS:

The following monuments were accepted and held as controlling monuments at the following locations:

- The Southwest corner of subject tract.....#5 rebar found with Opoku cap.
- Corner "A".....#4 rebar found.
- The Northeast corner of Lot 90.....1 inch diameter pipe found.
- The Northwest corner of Lot 89.....1 inch diameter pipe found.

Uncertainties due to variances between found controlling monuments and plat distances were found to be 0.4 feet in any direction. Uncertainties due to variances between all found monuments and record distances ere determined to be 2.2 feet in any direction.

(B) OCCUPATION AND/OR POSSESSION LINES:

Occupation and/or possession lines near the perimeter of subject tract are shown on the plat of survey with the variances from the boundary lines as established in this survey. Encroachments and/or discrepancies may be buried or otherwise obscured by natural or man-made obstructions. There are no observable uncertainties in occupation and/or possession lines.

(C) AMBIGUITY OF RECORD DESCRIPTIONS:

Upon review of the most current deeds of record, the base tract description does not contain any ambiguity within its record description or with the adjoining descriptions. Therefore, there are no uncertainties based upon record descriptions.

(D) RELATIVE POSITIONAL ACCURACY:

The relative positional accuracy representing the uncertainty due to random errors in measurements of the corners established in this survey is less than or equal to the specifications for a Suburban Survey (0.13 feet plus 100 ppm) as defined by IAC 865.

(E) ESTABLISHMENT OF LINES AND CORNERS:

1. The Northwest corner of subject tract was established on and along a line between the Southwest corner of subject tract and the Northwest corner of Lot 89, at plat distance from said Southwest corner.
2. The Northeast corner of subject tract was established at the intersection of plat distances from the Northeast corner of Lot 90 and the above-established Northwest corner of subject tract.
3. Corner "B" was established on and along the Southerly projection of a line between the Northeast corners of subject tract and Lot 90, at plat distances from said Northeast corner of subject tract.
4. The lines of subject tract were all established between the above-established corners of said subject tract.

SURVEYOR'S REPORT

(Continued from Page 2)

(F) NOTES:

1. This survey is an opinion of a licensed land surveyor of the State of Indiana as to the actual location of the lines and corners outlined in the deed description. This opinion is based on logic, relevant field and research evidence, and established surveying principles. However, this opinion is subject to the interpretation of its deed description, and the boundaries of adjacent tracts may not be consistent with the boundaries of subject tract. As a consequence, another surveyor may arrive at different conclusions resulting in a different location of the boundaries.
2. A survey cannot resolve uncertainties in the position of the original boundaries that exist. Only courts may establish property lines. The boundaries were established from the most current recorded descriptions. An abstract or title search may reveal the existence of matters of ownership and rights of others not otherwise apparent.
3. The flood statement on Page 1 is for informational purposes only. Accurate determination of the flood hazard status of the property can only be made by an elevation study which is beyond the scope of this survey.
4. No attempt has been made to review or come to an opinion on the title or marketability of the title. Any appearance of an opinion on the title is unintentional.
5. Unplatted easements, setback lines, restrictive covenants, or land use regulations affecting the subject tract are shown only when documentation of such matters has been furnished by the client. As of this date, no title commitment has been provided for review.
6. All documents of record and information from other public sources referred to in the survey are hereby incorporated as part of this survey as if fully set out.
7. No attempt has been made to determine the zoning status of the property. It is the responsibility of the parties involved in the real estate transaction to determine compliance with zoning regulations.
8. Any fence or other evidence of possession which varies from the written title lines may constitute adverse possession or prescriptive rights.
9. Subsurface and environmental conditions were not examined or considered as a part of this survey.
10. Expression of distances to hundredths of a foot and angles to seconds of arc is solely to minimize errors introduced by rounding. Neither distances nor angles can be measured to the degree of precision implied by the stated units. No dimension on the survey can be interpreted to be of greater precision than the relative positional accuracy stated in Part (D) of the Surveyor's Report.
11. Since the last date of fieldwork of this survey, conditions beyond the knowledge or control of Sauer Land Surveying, Inc., may have altered the validity and circumstances shown or noted hereon.
12. Declaration is made to original purchaser of the survey and is not transferable to additional institutions or subsequent owners. This survey is valid only with the surveyor's original or electronic signature and seal, full payment of invoice, and complete with all pages of the survey.
13. No statement made by any employee or agent of Sauer Land Surveying, Inc., is valid unless written herein.

I, Joseph R. Herendeen, certify the above statements to be correct to the best of my information, knowledge, and belief. I affirm, under the penalties for perjury, that I have taken reasonable care to redact each Social Security number in this document, unless required by law.
